

# ASSET MANAGEMENT @ POR

DON'T PLAN REPAIRS. PREDICT THEM

**Port of Rotterdam's road to world-class asset management**  
AAPA 2019 Facility Engineering Seminar, Jacksonville (FL), April 25<sup>th</sup>, 2019

# Port of Rotterdam in figures

## Port of Rotterdam engine of the economy

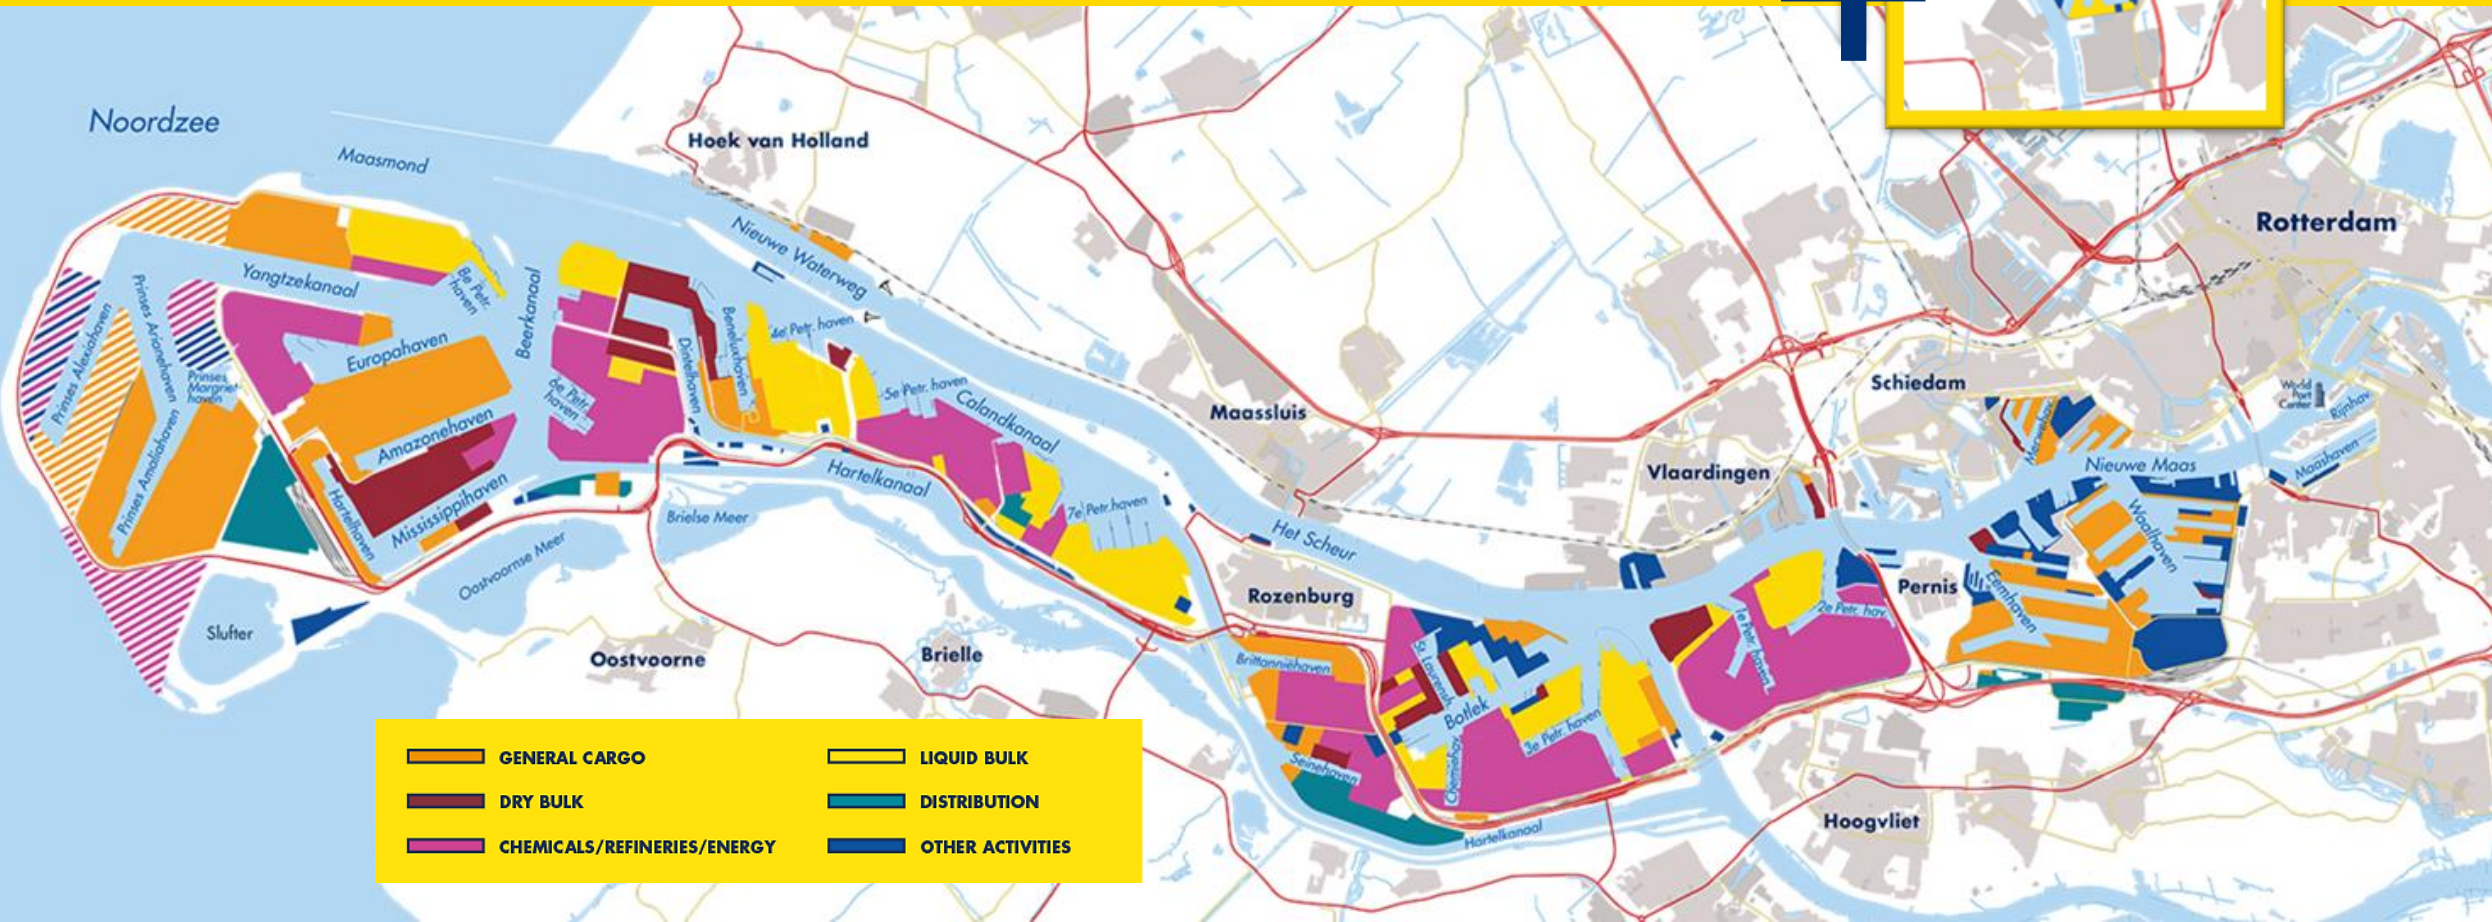

- Total port area 12,643 ha (net 6,046 ha)
- Total employment 385,000 people\*
- Total added value € 45 billion (6.2% GNP)\*
- 3,000 companies
- Largest port in Europe, 10<sup>th</sup> port worldwide
- Throughput 2018: 469 mln tons; 14.5 million TEU
- Depth up to 75 ft (= 24 m)
- Visits (2018): 29,475 sea-going vessels  
120,000 inland navigation

Employment

# Port and industrial area

# Dominated by fossil fuels and logistics

Cargo ratios in 2016

■ Liquid bulk

■ Containers

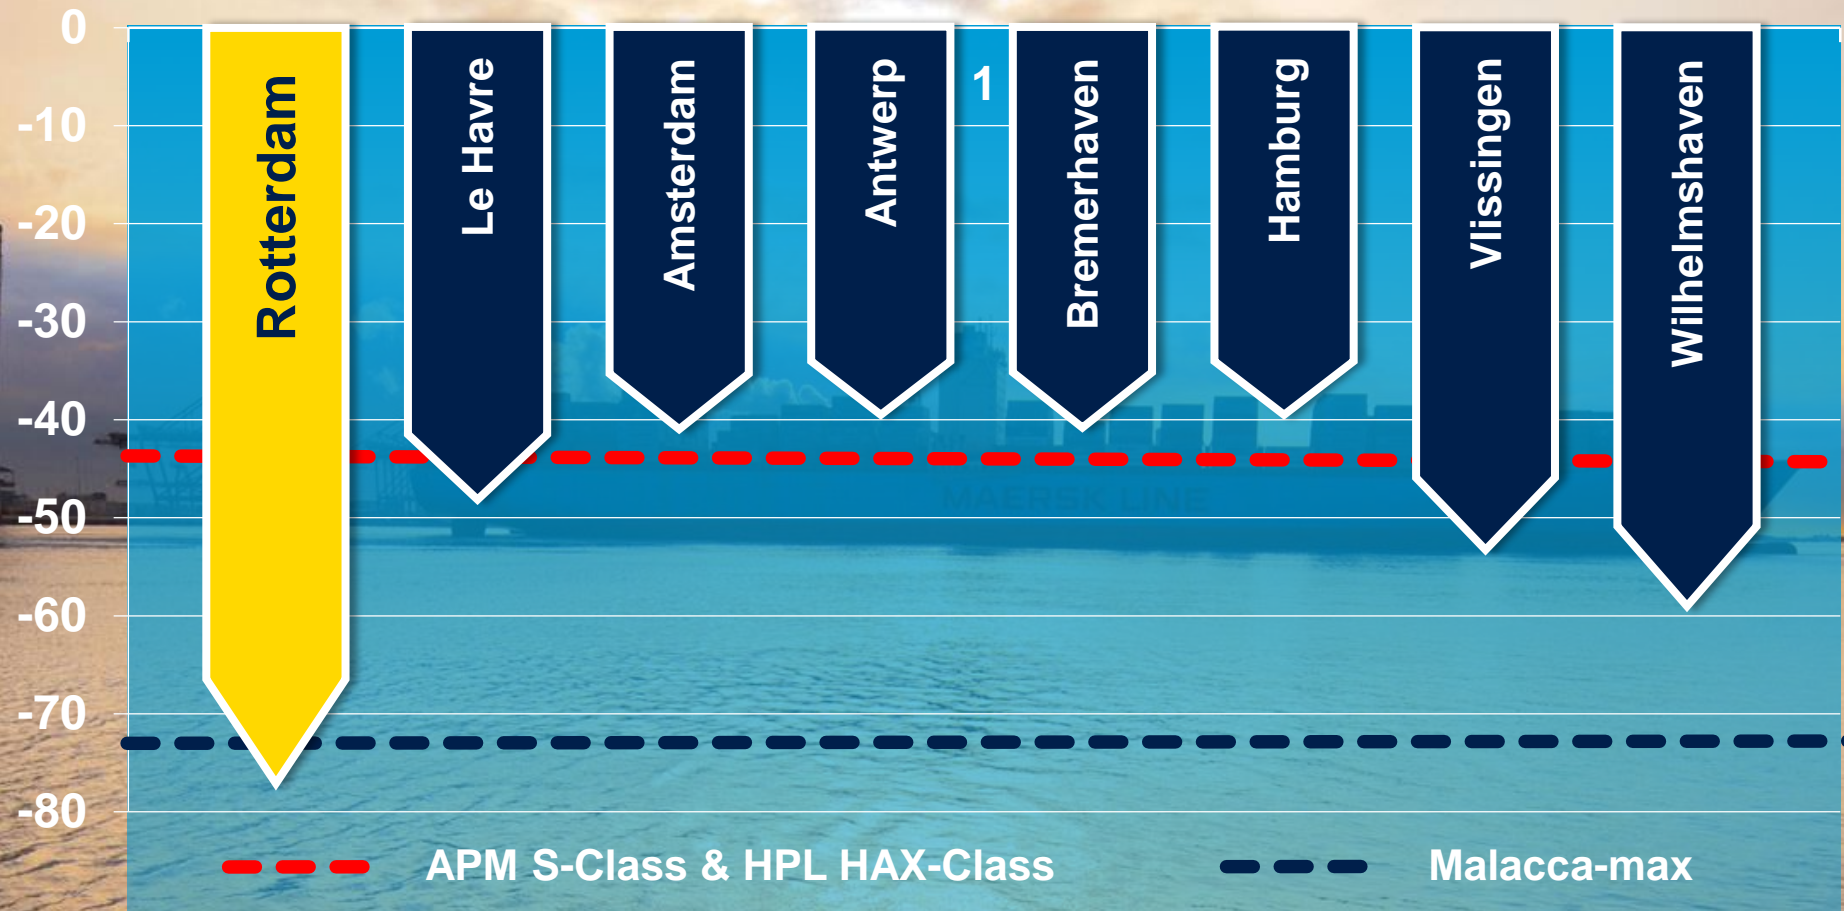

■ Dry bulk

■ Breakbulk

# Water depth European ports

# Top 20 world ports

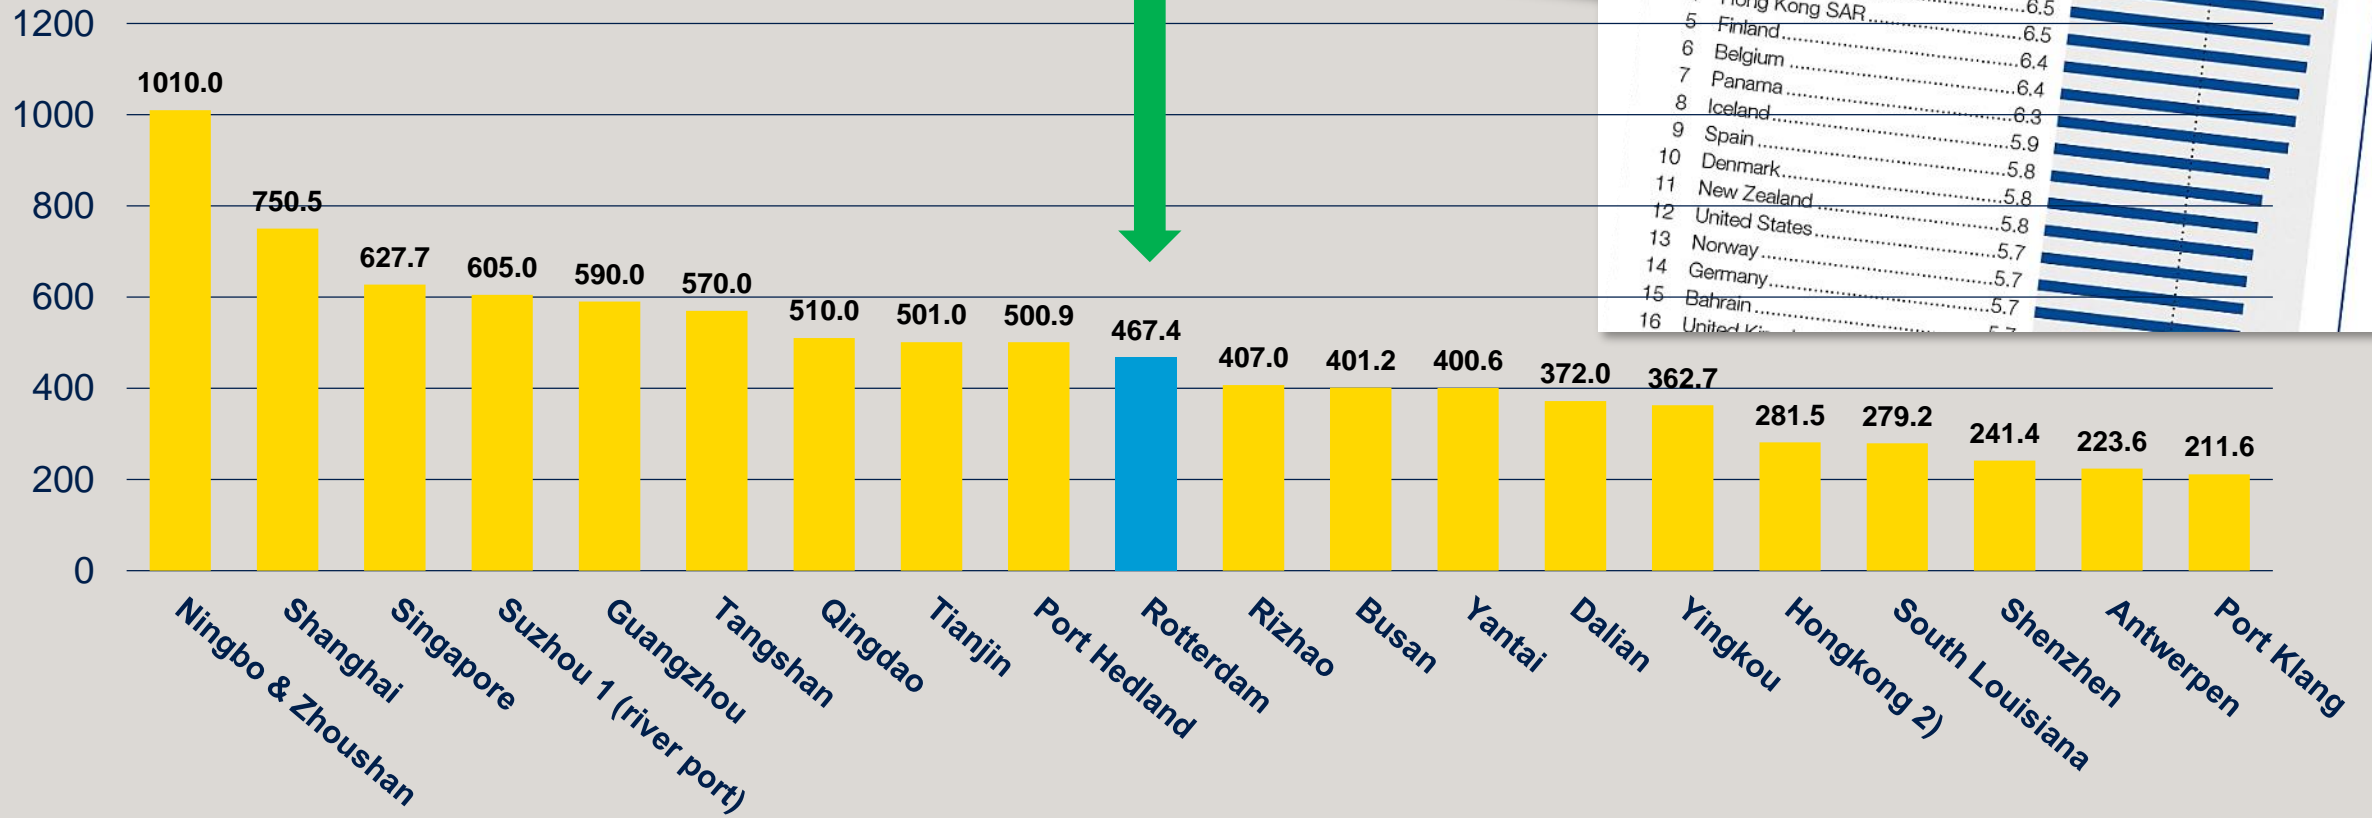

#1 for 6th time in a row

## 2.04 Quality of port infrastructure

In your country, how would you assess the quality of seaports? (For landlocked countries: How the worst in the world; 7 = extensive and efficient—among the best in the world) | 2013–14

RANK	COUNTRY/ECONOMY	VALUE	MEAN
1	Netherlands	6.8	4.1
2	Singapore	6.7	
3	United Arab Emirates	6.5	
4	Hong Kong SAR	6.5	
5	Finland	6.4	
6	Belgium	6.4	
7	Panama	6.4	
8	Iceland	6.3	
9	Spain	5.9	
10	Denmark	5.8	
11	New Zealand	5.8	
12	United States	5.8	
13	Norway	5.7	
14	Germany	5.7	
15	Bahrain	5.7	
16	United Kingdom	5.7	

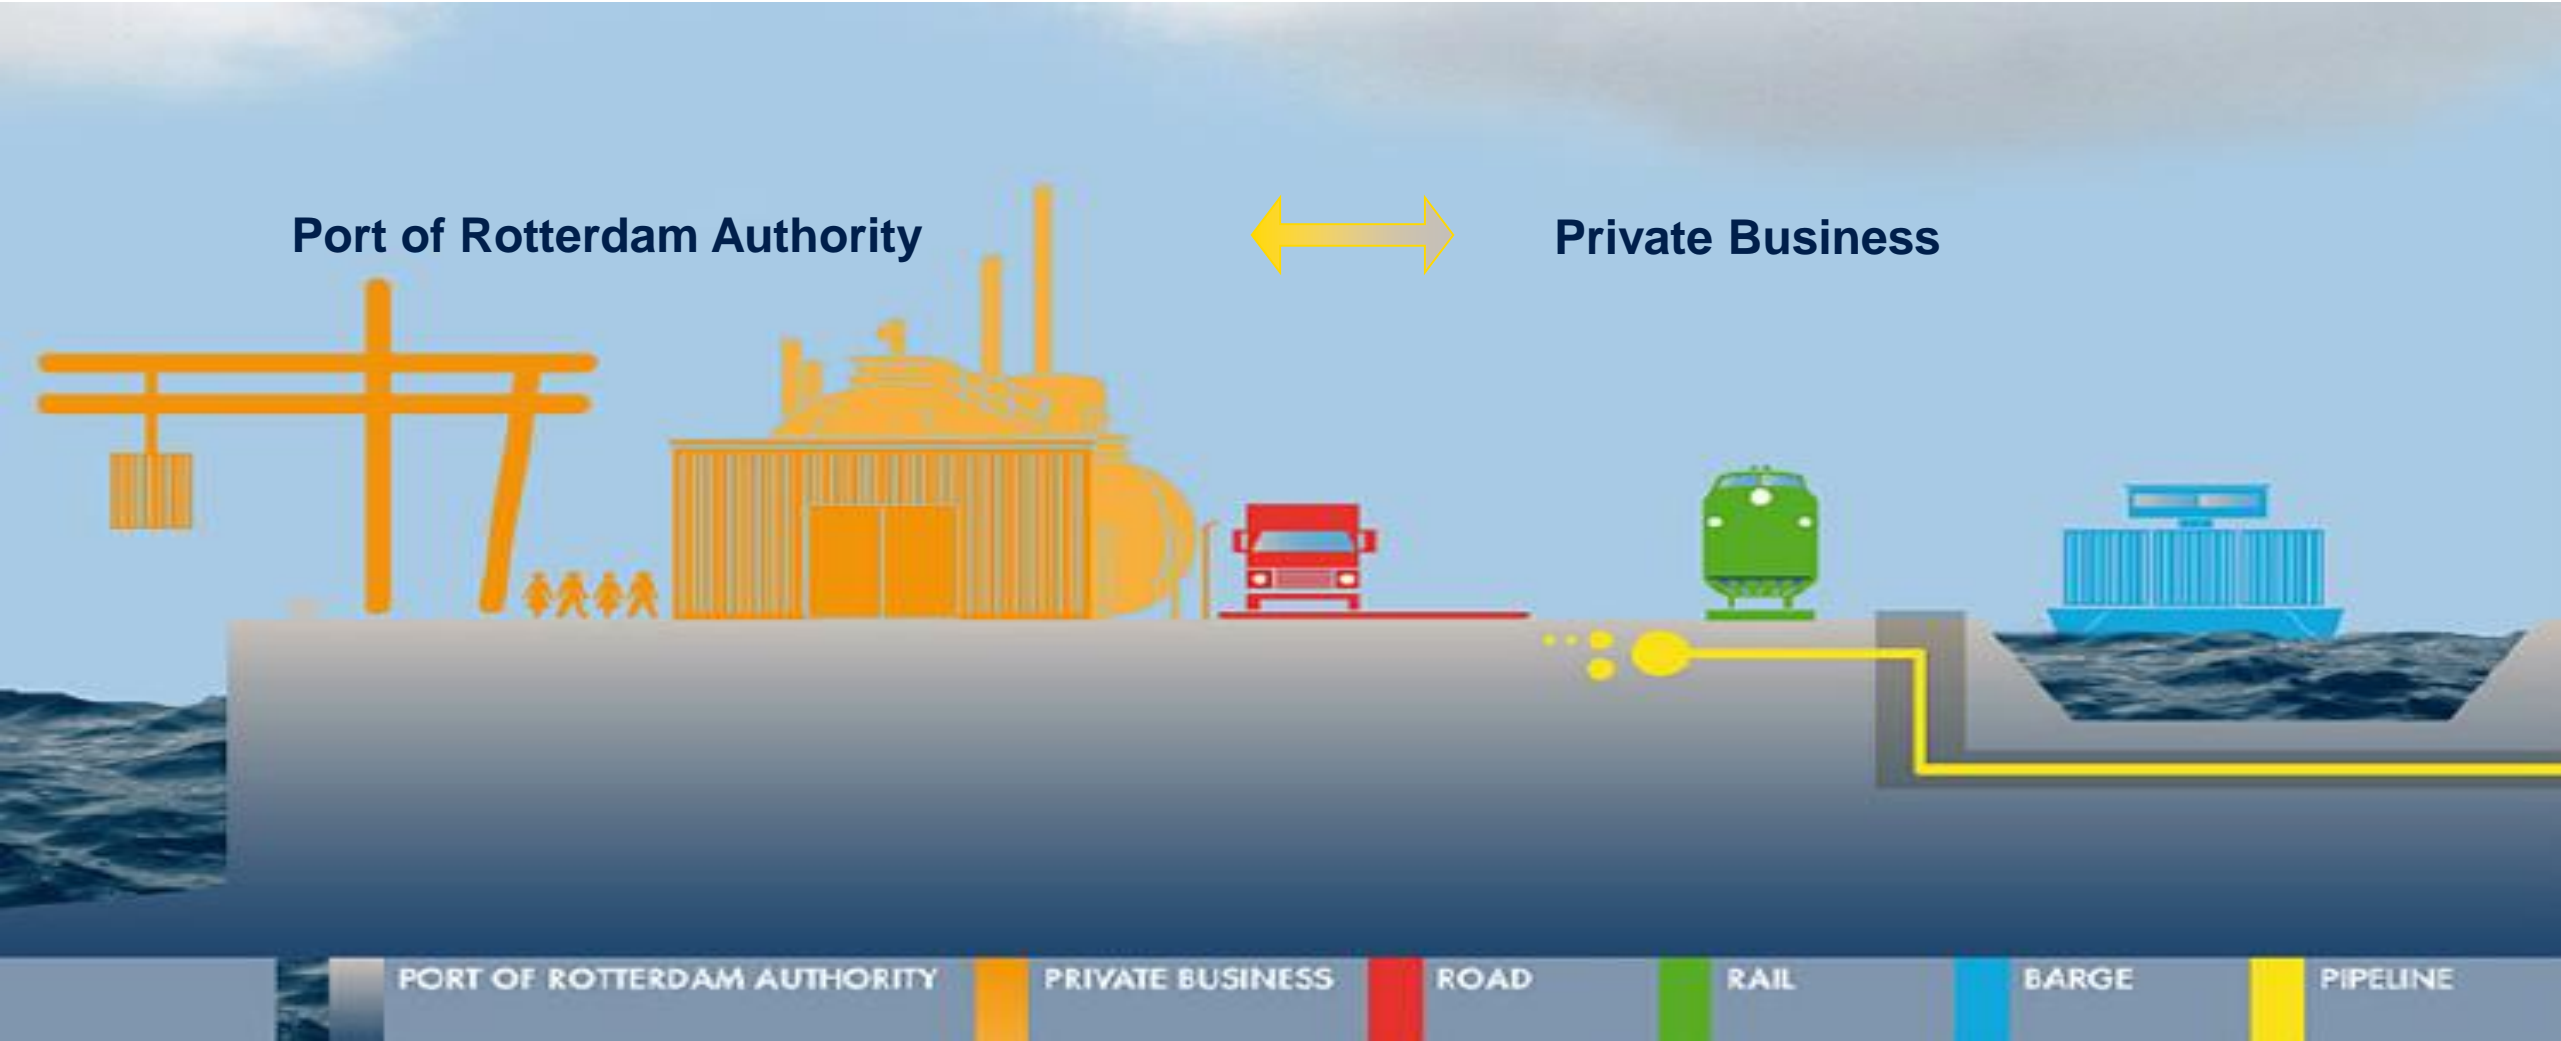

x 1 million tons (2017)

# Landlord port model

# The assets of PoR

## Total of 32 asset types

- 70,5 km Quay walls
- 180 km Embankment
- 310 ha Roads
- 3.500 ha Sea bed
- Civil Structures, Buildings, Vessels etc.

**Invested Capital € 3,66 Billion**

**Maintenance budget € 72 Million**

**Approx. 120 employees in AM**

# Deterioration of Infrastructure Assets

- Deferred maintenance costs
- Inadequate capital allocation
- Run-to-failure repair & maintenance programs
- Inspections based on random observations
- Loss of competitive edge and productivity
- Safety/security concerns

# Asset Management : A Strategic Imperative

Waterfront structures like quays, jetties and wharves are the pivot of the business case

Income of the Port depends on the availability of the asset

Loss of profit will decrease cash flow and thus the opportunity to invest in the future

Disruption to the tenant's business is the most unwanted situation

# Asset Management - More Challenges

More intensive use of assets

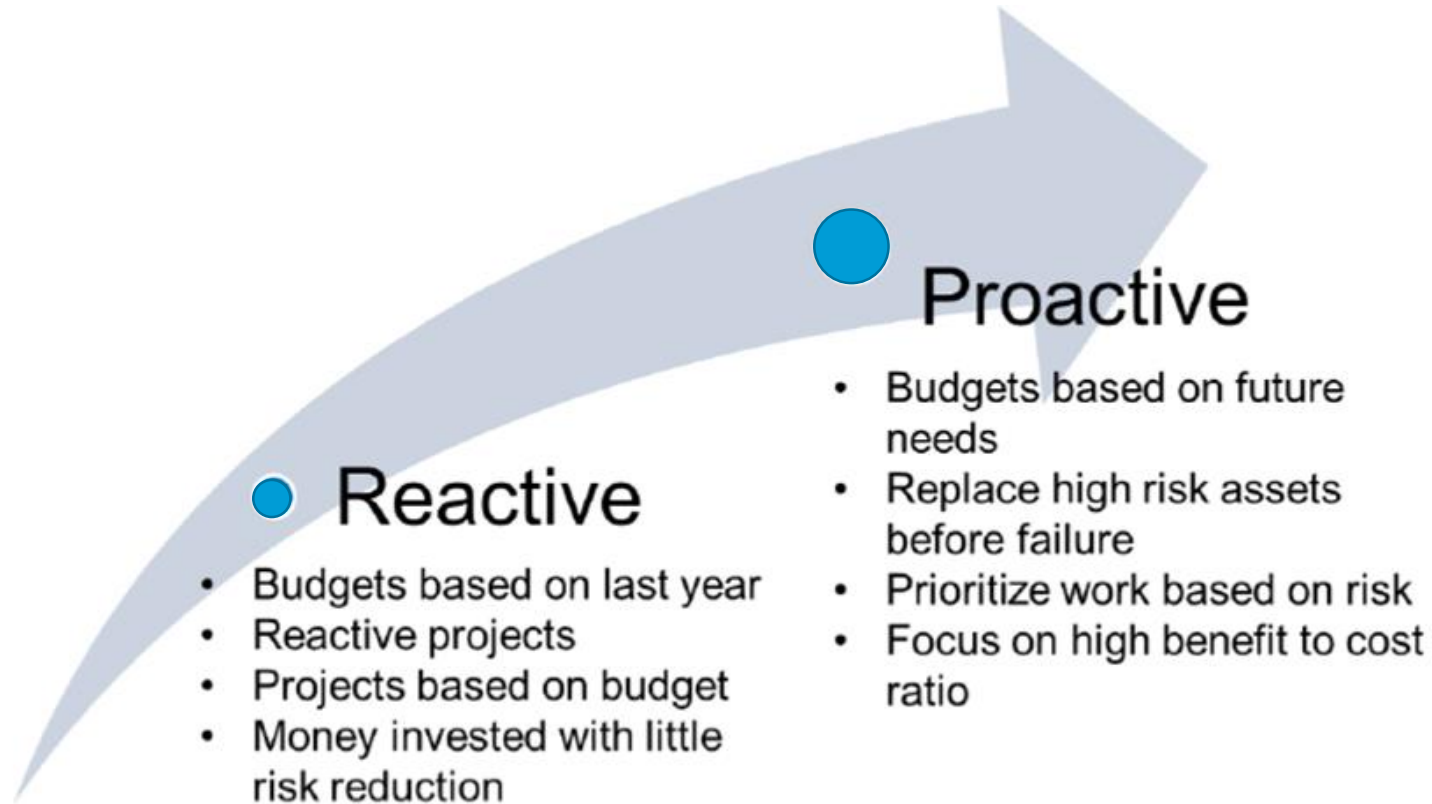

Justification of maintenance plan to board of directors

Extension of tenant leases

# Objective in Asset Management Culture

# Asset Management Program: Stepstones

Step 1 : Document the assets owned and managed

Step 2 : Understand the current condition of the assets

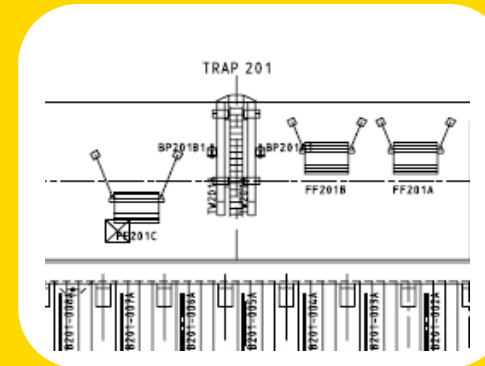

Step 3 : Understand what budget is needed to catch up, keep up and move forward

Step 4: Understand what endangers the functionality : risk analysis

Step 5 : Understand the business value, what the contribution of an asset to the business goals

Step 6 : Establish the level of service for an asset and calculate the cost of service

Step 7: Prioritize the needed budget based on risk and business value

# Expert system: KMS

- Port of Rotterdam developed in partnership an asset management tool called KMS, which is the Dutch abbreviation of Quay wall Modeling System that:
  - Uses the results of **deterioration models for concrete and steel** and compares it with the “end of contract” date
  - Identifies and ranks **the risks** that endanger all the functionalities of the structure
  - Uses the **business value** of a quay wall to clarify its maintenance priority

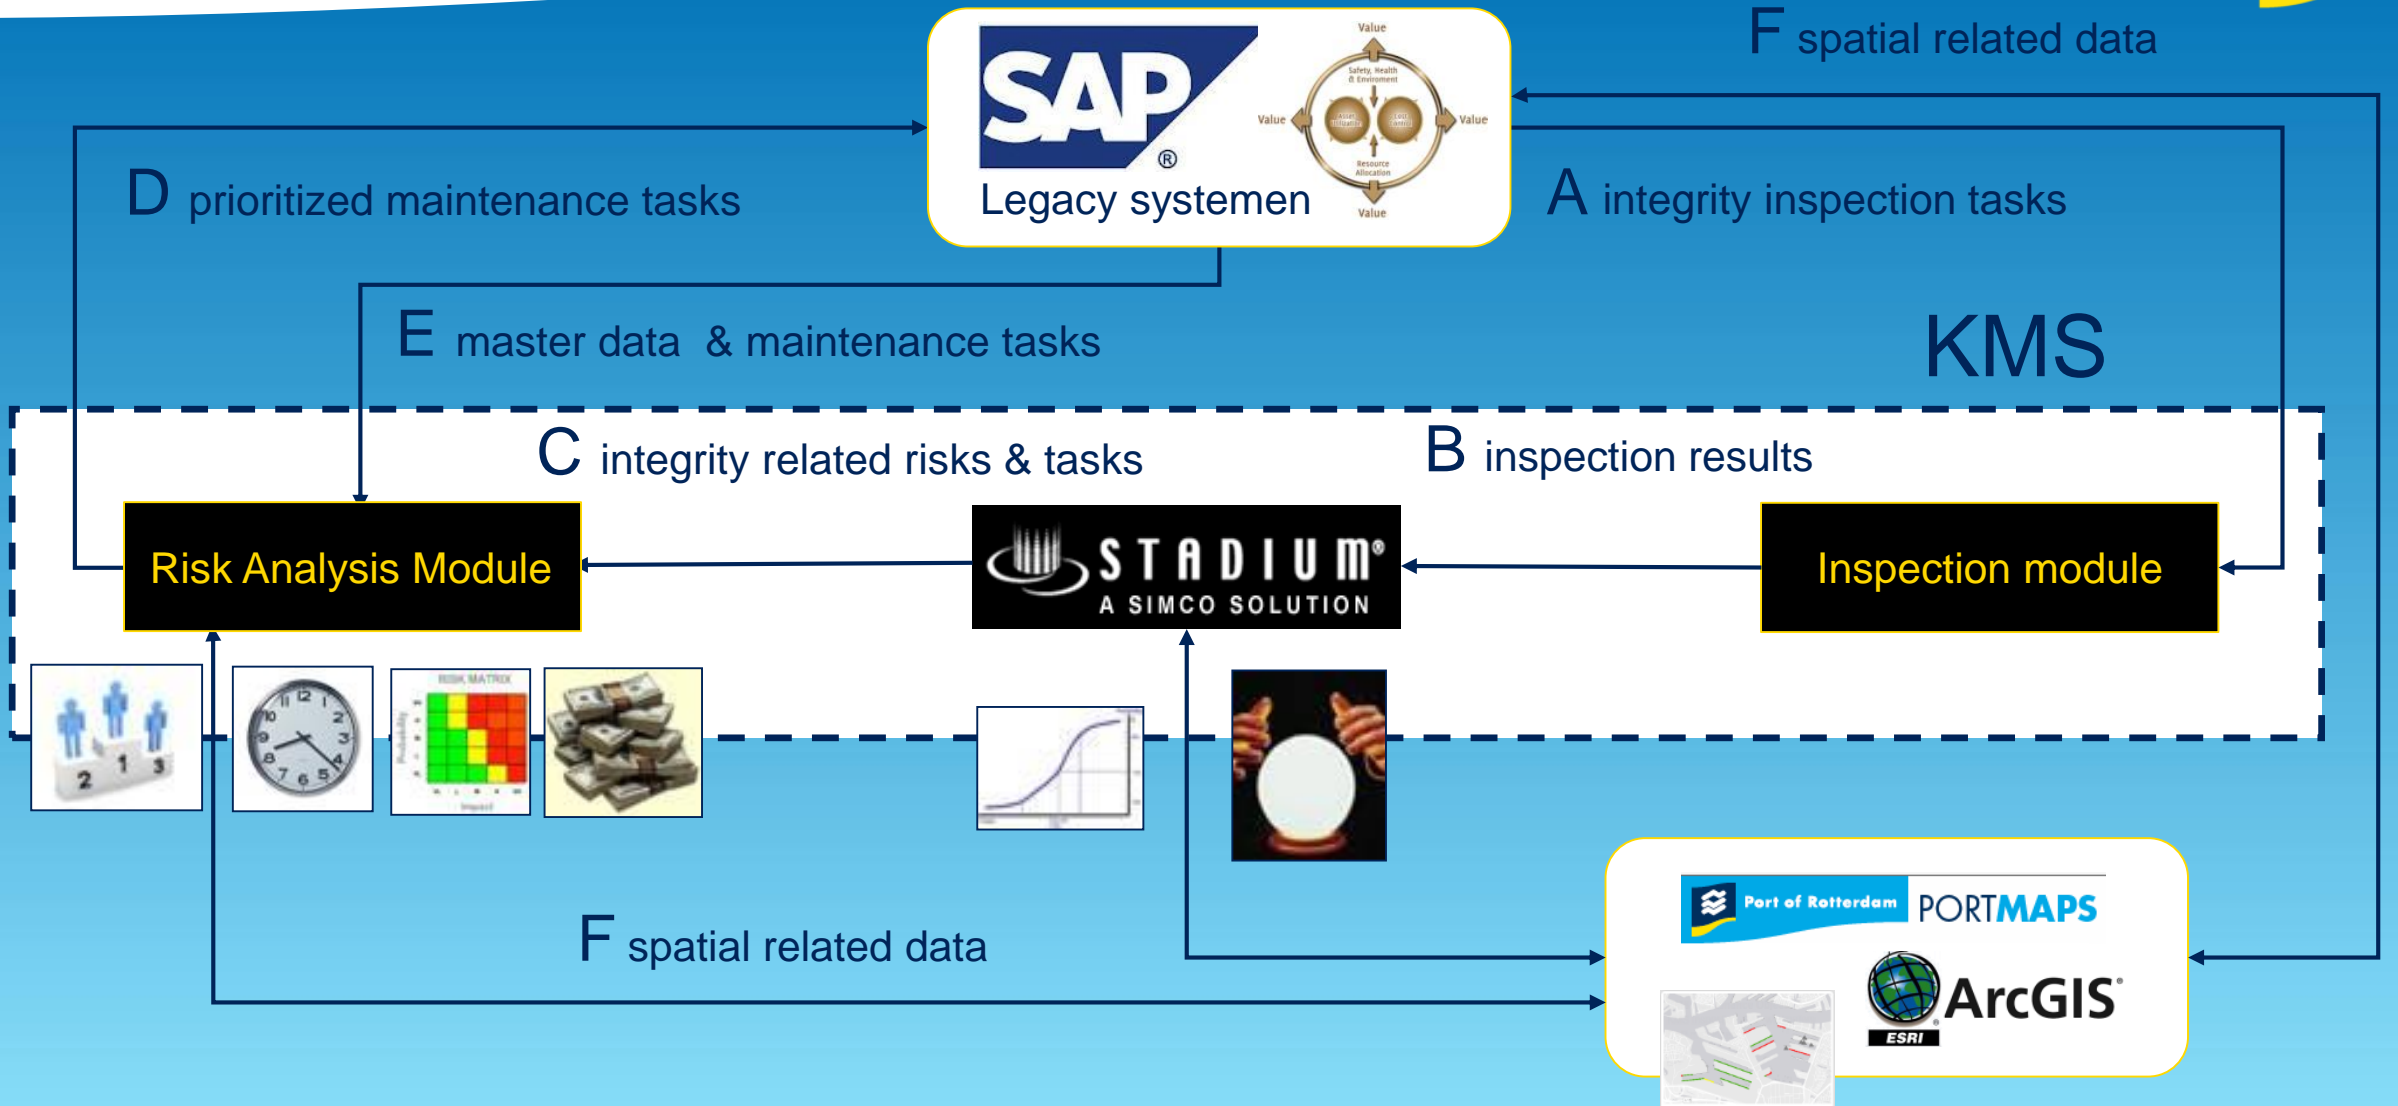

## KMS Quaywall Modelling System

A photograph of a long, grey concrete quay wall under construction, extending into a body of water. The sky is clear and blue, and the water is dark. In the background, there are some construction cranes and structures.

Port of Rotterdam's  
next step in world-class  
asset management

# The KMS system

# Asset Management on Quay Walls

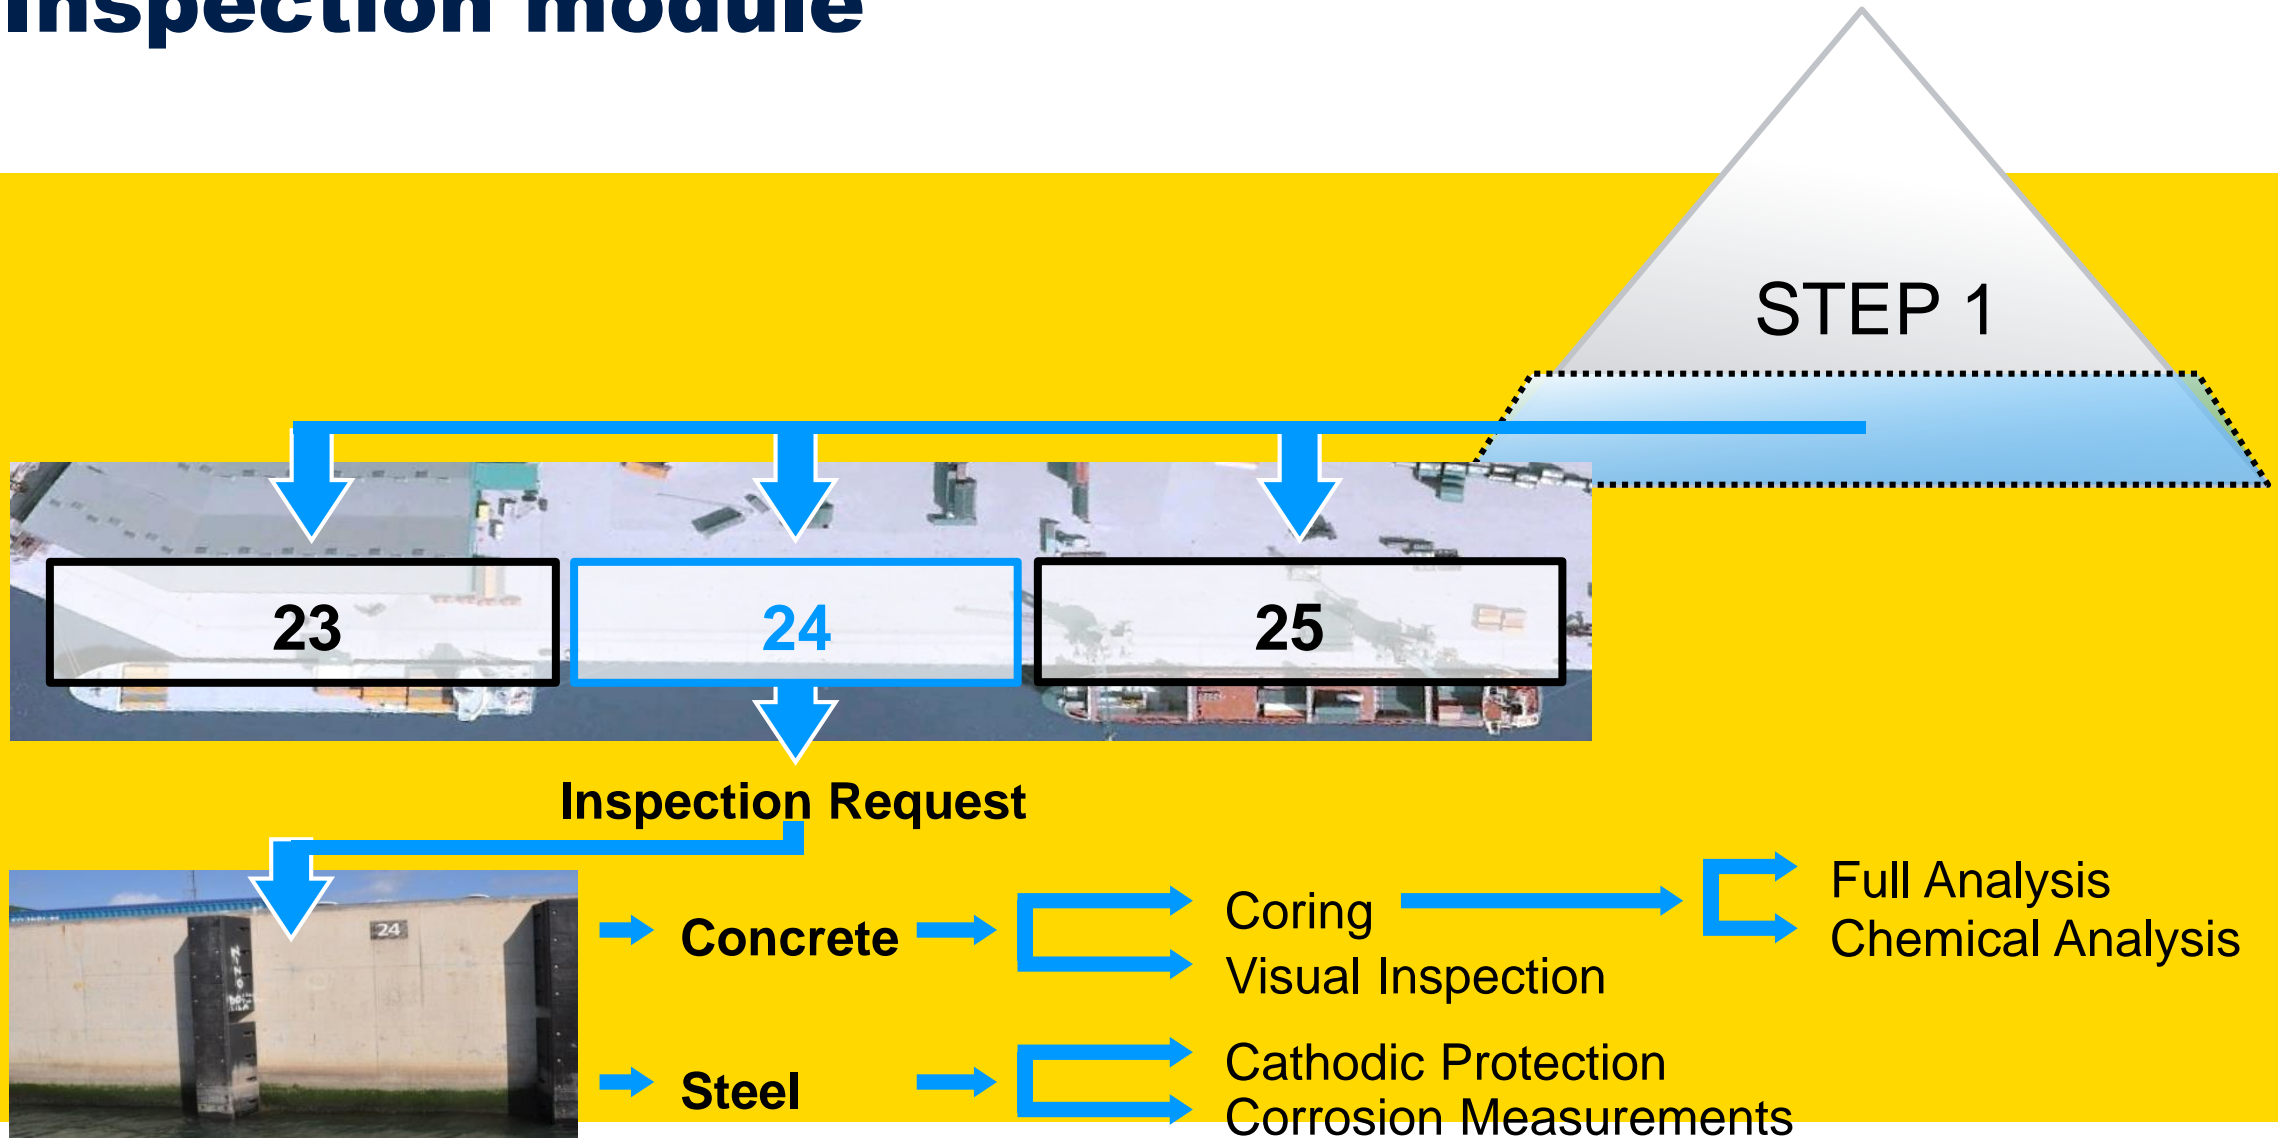

- A quay wall's remaining lifetime and system integrity is mainly determined by the quality of the sub and superstructure.
- When the quay wall's integrity is in danger, it's often due to:
  - accelerated low water corrosion occurring at the substructure or
  - concrete deterioration in the superstructure

2015	PARC3551	Barbeque Grills		Replacement		\$1,000.00
2015	PARC3550	Trash Bins - Lid		Replacement		\$4,400.00

# KMS Benefits

- Short term:
  - Transparency in annual budget for maintenance
- Mid - Long Term:
  - Insight on residual service life and maintenance costs per structure
  - Insight on total port concrete and steel costs
- “Just in time” inspections
- Proactive, prioritized and risk-based maintenance
- Save \$\$\$

# Return on Investment (ROI)

With More than 70 KM of Quay Walls...

# Improvements in modelling: Anode lifetime

Mass(t) / Initial Mass at Time=0 a

# Smart Infrastructure : Inspection vs sensing

“The inspector of the future is a sensor”

# STATUS APS'S

A system status dashboard for APS unit 83-T07. It features a Google Maps satellite view of the unit's location. On the left, there are three colored circles representing system status: a pink circle, a yellow circle, and a green circle. On the right, there is a list of system parameters and their status:

- Low voltage:
- Inverter Aan:
- Overspanning detectie:
- Solar/Accu uit:
- Noodstop ingeschakeld:
- Verbindingsfout:

Below this list is an 'Alarm' section with a table of events:

Alarm	Time
Solar/Accu uit	03-Jun-2016 11:29:56
Inverter Aan	06-Jul-2016 12:39:00
Low Voltage Detectie	24-Jun-2016 09:30:21
Noodstop	06-Jul-2016 12:23:44

At the bottom, there is a line graph showing 'Acc (Ah)' and 'Batterijstatus (%)' over time. The 'Acc (Ah)' graph shows a blue line fluctuating between 99.8 and 100.0. The 'Batterijstatus (%)' graph shows a green bar at 100.0%.

# SMARTEST PORT

Quay walls, buoys and dolphins that predict their own maintenance

Berths that tell shippers when they will be free again

Waterways that manage their own dredging schedule

Ships that automatically follow the most efficient and safest route

Cargo that knows where and when it shall be

# Proactive, Predictive & Smart Waterfront Asset Management A Strategic Imperative for the Port of Rotterdam
