US Army Corps of Engineers®

*Innovative solutions for a safer, better world*

# Presentation Overview

- Report - The 2017 Hurricane Season: Recommendations for a Resilient Path Forward for the Marine Transportation System
- 2017 Hurricane Season Data Gathering
- Port Resilience Assessment and Decision Guide

# Resilience Over Time

# Cycle of Resilience

Through data and experts elicitation, we can gather information on *how* the MTS was able to **Resist** and **Recover** to inform future **Adaptation** and **Preparation**

- Key actions or decisions
- Datasets to aid critical actions and decisions
- Interdependencies with non-feds
- Best practices
- Opportunities to increase resilience

# U.S. Committee on the Marine Transportation System Resilience Integrated Action Team (R-IAT)

Katherine Chambers (ERDC-CHL) presents hurricane analysis results to the U.S. Committee on the Marine Transportation System Coordinating Board

- R-IAT requested by the Coordinating Board to ID lessons learned from 2017 hurricane season
- 12 member agencies
- 1 workshop with 35 workshop attendees
- Team co-lead by USACE-ERDC and NOAA

# 2017 Hurricane Season

- 17 named storms
- 7 U.S. landfalling storms
  - 3 major hurricanes: Harvey, Irma, Maria
- 25.8 million people affected
- 4.6 million registered for federal assistance with FEMA
- Weather events in 2017 amounted to \$306.2 billion in cumulative costs which included hurricanes Harvey (\$125B), Irma (\$50B), and Maria (\$90B)\*

Satellite image of three hurricanes in the Atlantic at once on Sept. 8: Katia, Irma and Jose. (NOAA/NASA)

\* NOAA Office for Coastal Management, [Fast Facts: Hurricane Costs](#).

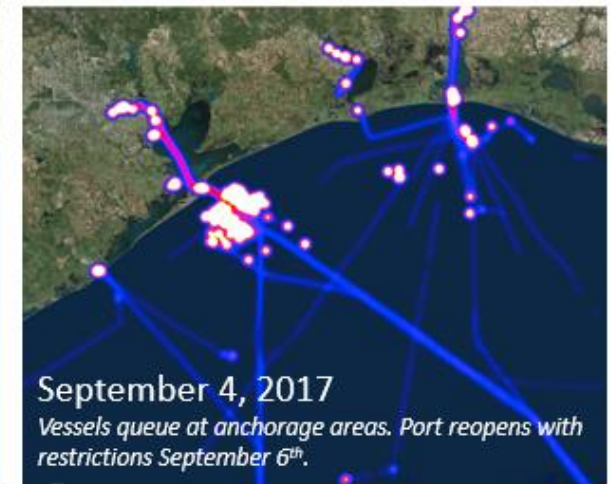

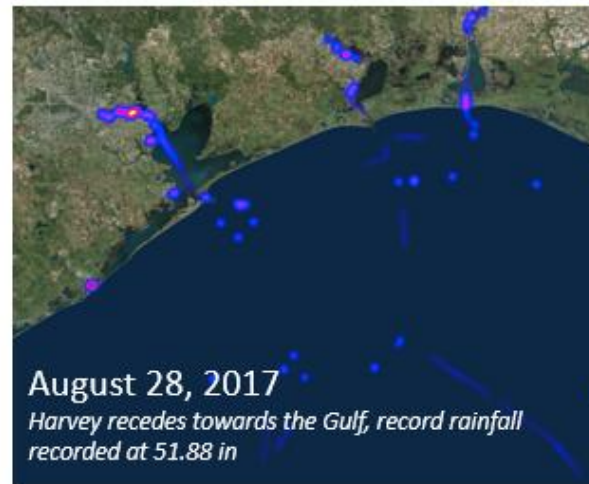

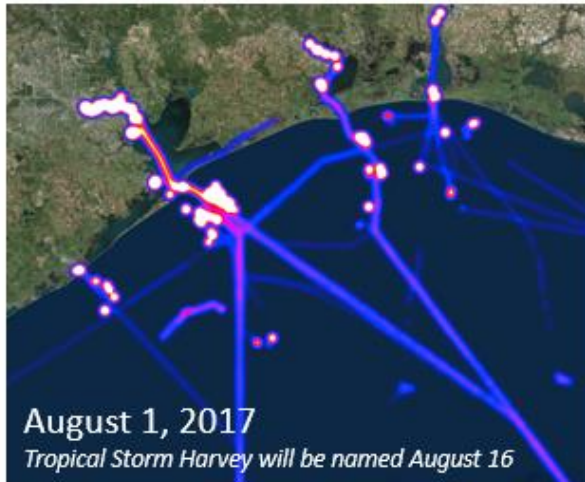

# IMPACTED PORTS ACROSS TX, FL, PR, and VI

# Gulf Region

## Hurricane Harvey Cargo and Tanker Vessel Signal Density Plots

Created with ERDC Automatic Identification System Analysis Package (AISAP)

ERDC Navigation Data Performance Team: Katherine Touzinsky, Kenneth N. Mitchell, Patricia Dijoseph, Marin Kress

# Hurricane Harvey

- **Challenges**

- Flooding caused indirect impacts to supporting infrastructure
- Lack of knowledge management and collaborative tools regarding port condition or status
- Redundant information requests

- **Successes**

- Early communication
- Centralized information distribution
- Pre-prioritized resource placement
- Execution of drills and training
- Early closure of energy facilities
- Efficient restoration of ATONS following storm
- Cross agency communication
- Engagement with public sector for resource needs
- Delegation of FEMA mission assignments

# Hurricane Irma

- Challenges

- Power outages
- Debris removal between storms
- Resource allocation between commerce, tourism, & EM
- Equipment pre-positioning in FL
- Availability of resources and funds

- Successes

- Early communication on critical ports and supporting infrastructure
- Critical Aids to Navigation identified in advance
- Updated coastal imagery for fast surveys
- Transportation and accommodation arrangements
- Mobile integrated Survey Team kits when operating vessels of opportunity
- Repurposing vessels directed to Texas
- Coordination with local business advisory councils and initiatives

# Hurricane Maria

- Challenges

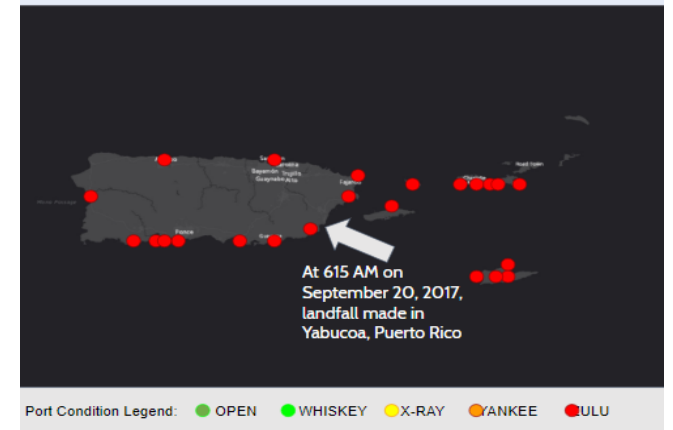

- Lack of space for shipping & seaport operations
- Lack of supporting infrastructure (road, electric, water)
- First responder challenges
- Negative press
- Balancing emergency supply with commercial supply

- Successes

- First responders with Spanish language skills
- Interagency collaboration and sharing of information
- AIS-ATON utilized to help facilitate re-opening of San Juan by rapidly triaging ATONS in the field

Maria - USVI & Puerto Rico - Sept 20, 2017

# Summary: Best Practices for MTS Response and Recovery

- Hurricane Season Kickoff Meeting
- Full Scale Hurricane Exercise
- Clear lines of communication
- Interagency efforts for navigation channel reopening
- Pre and post-storm port assessments
- ATON verification and resiliency

# Summary: Opportunities to Enhance Response and Recovery

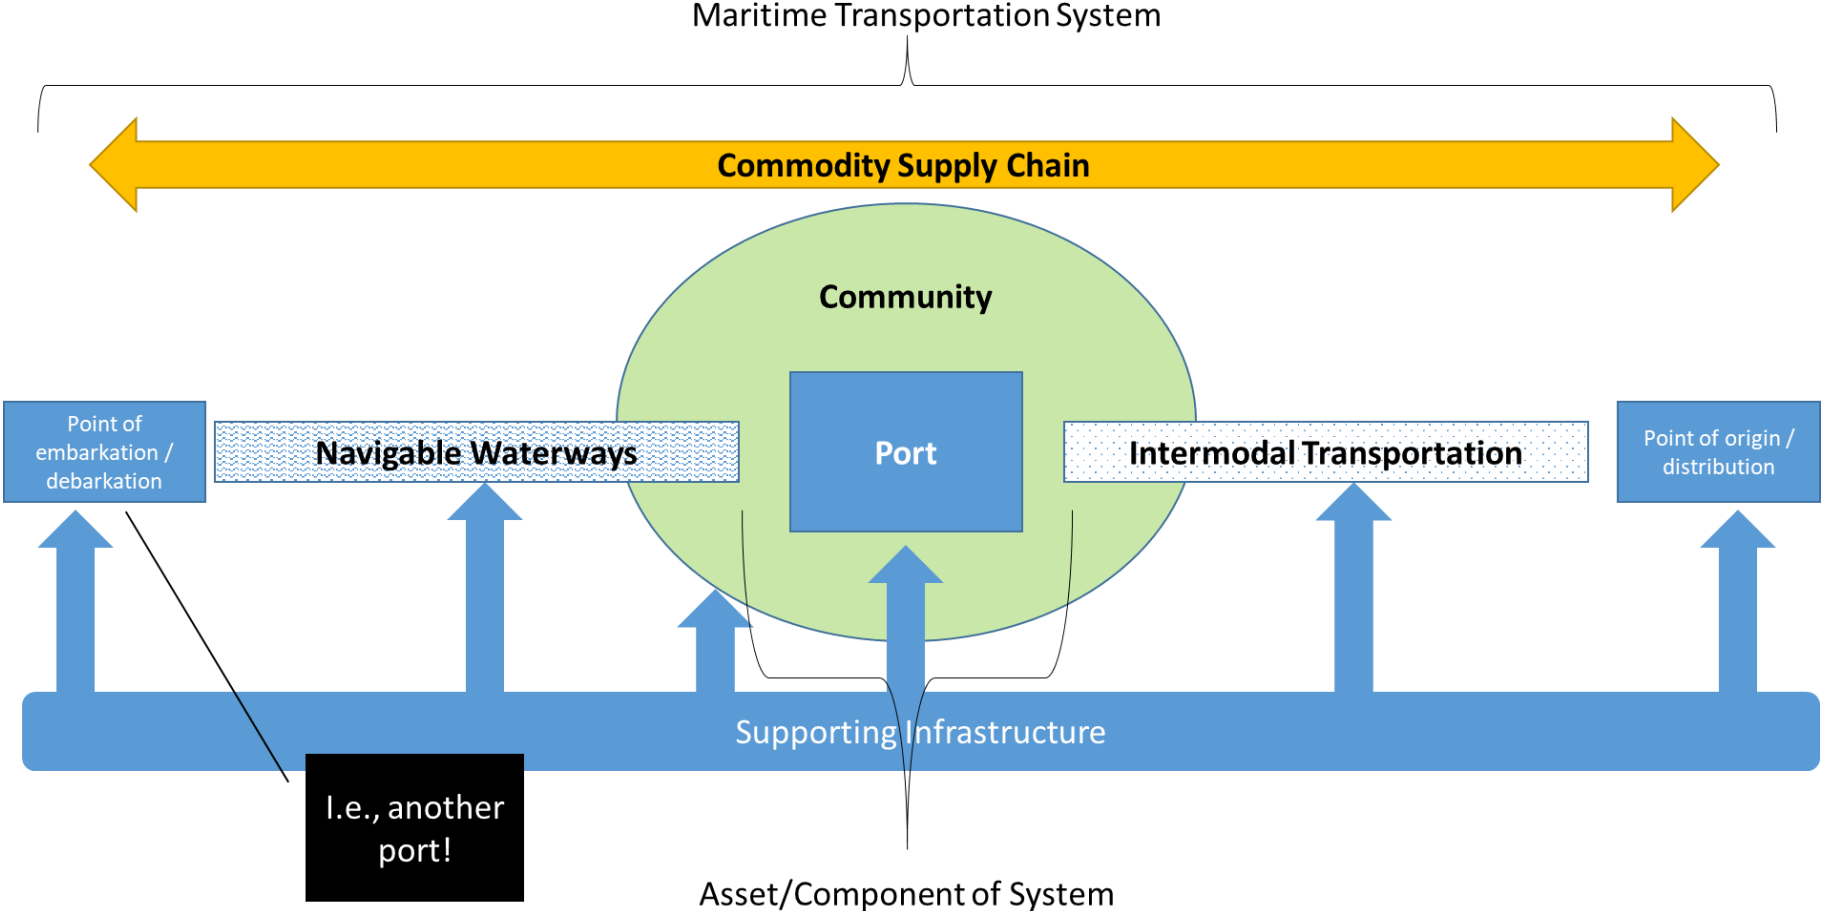

- Need for tools & protocols for prioritization at the regional or national level
- Pre-staging of survey teams & equipment
- Evaluating Port Status vs. Channel Status
- How to aid port employees returning to work

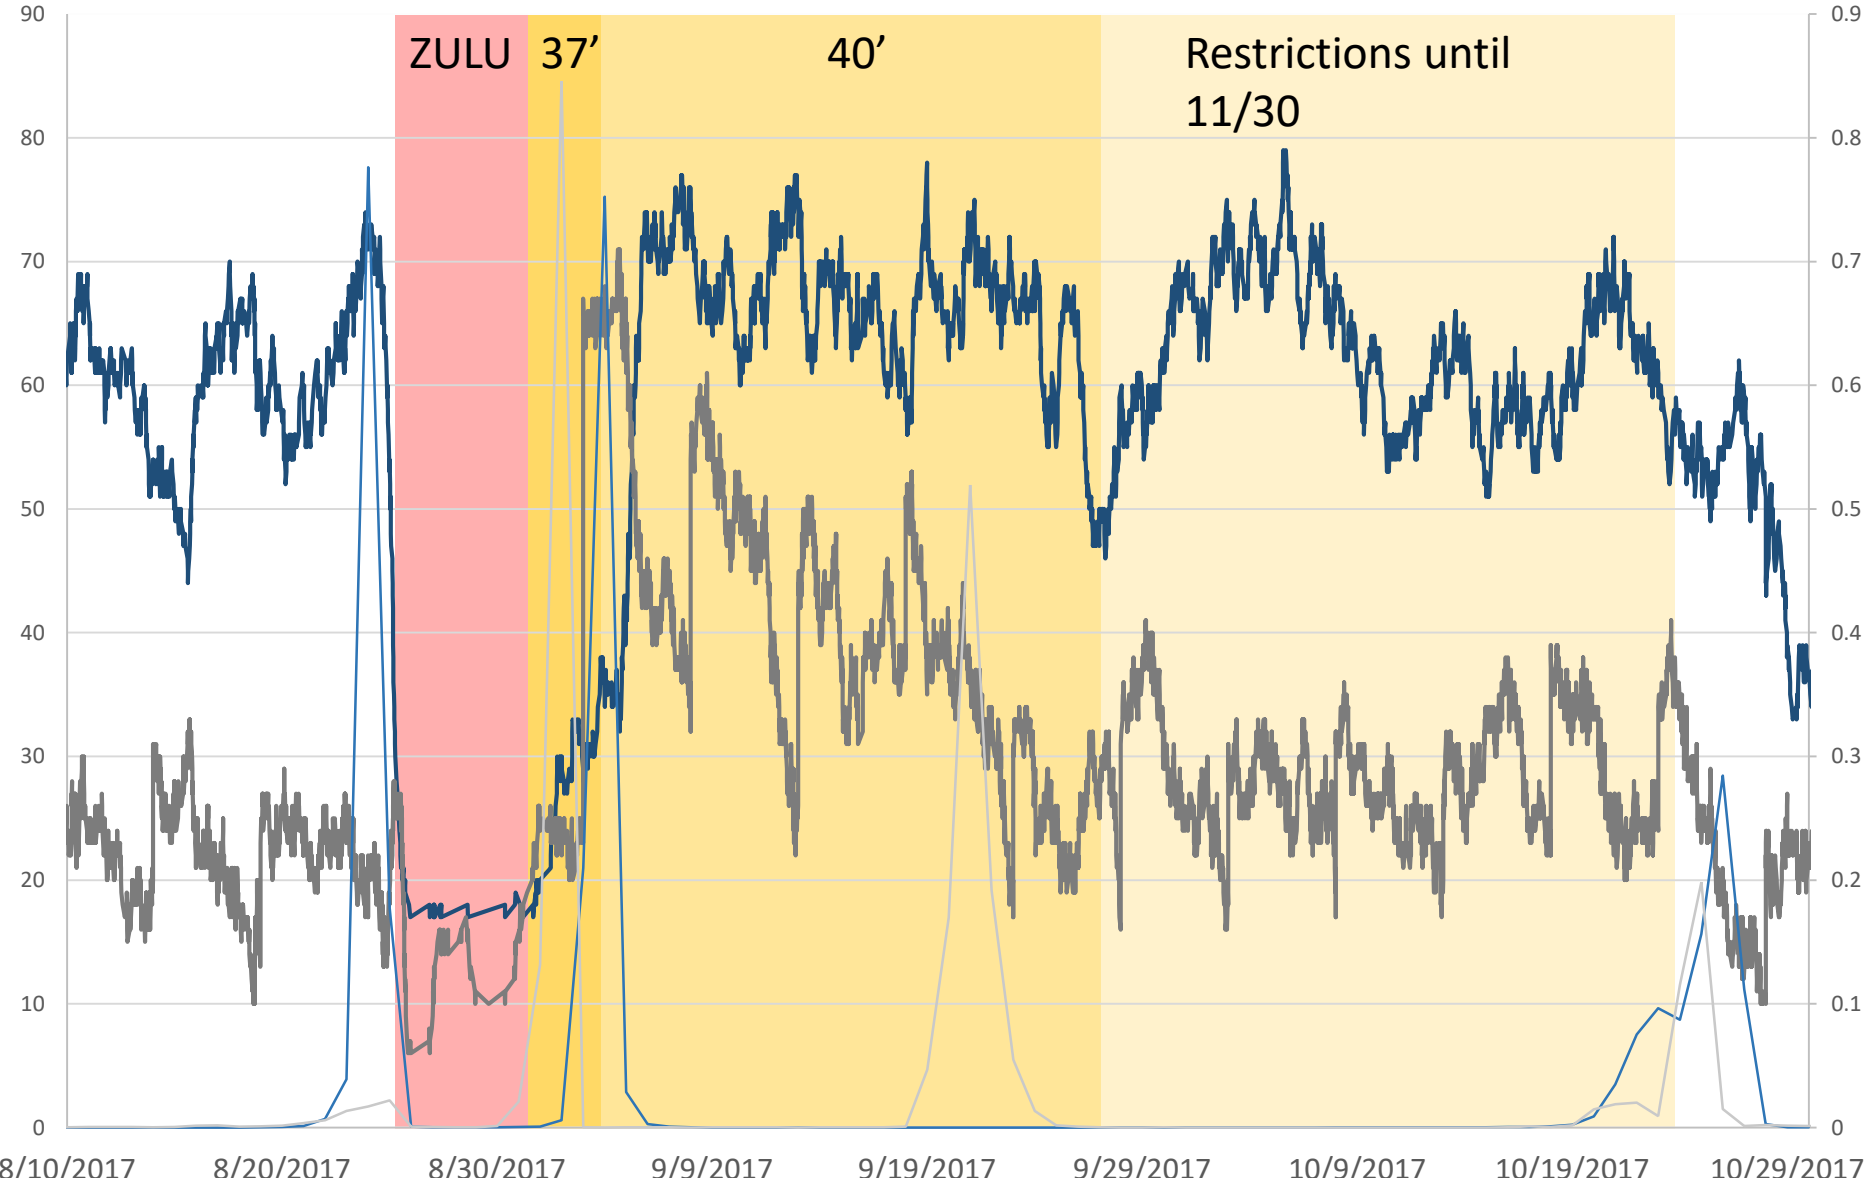

# Data Analysis of Hurricane Impacts

- Automatic Identification System (AIS) Data can be used to understand more than just heatmaps!
- Captures recovery via observational data
- Can provide insights into MTS performance via the function of commodity movement on waterways

# Single Port System

# Houston-Galveston Port Area - Cargo and Tanker Net Vessel Counts

— Houston-Galveston Port Cargo Tanker NVC

— Houston-Galveston Port PCP

Linear (Houston-Galveston Port Cargo Tanker NVC)

— Houston Galveston Anchorages - Cargo and Tanker NVC

— Houston-Galveston Anchorage PCP

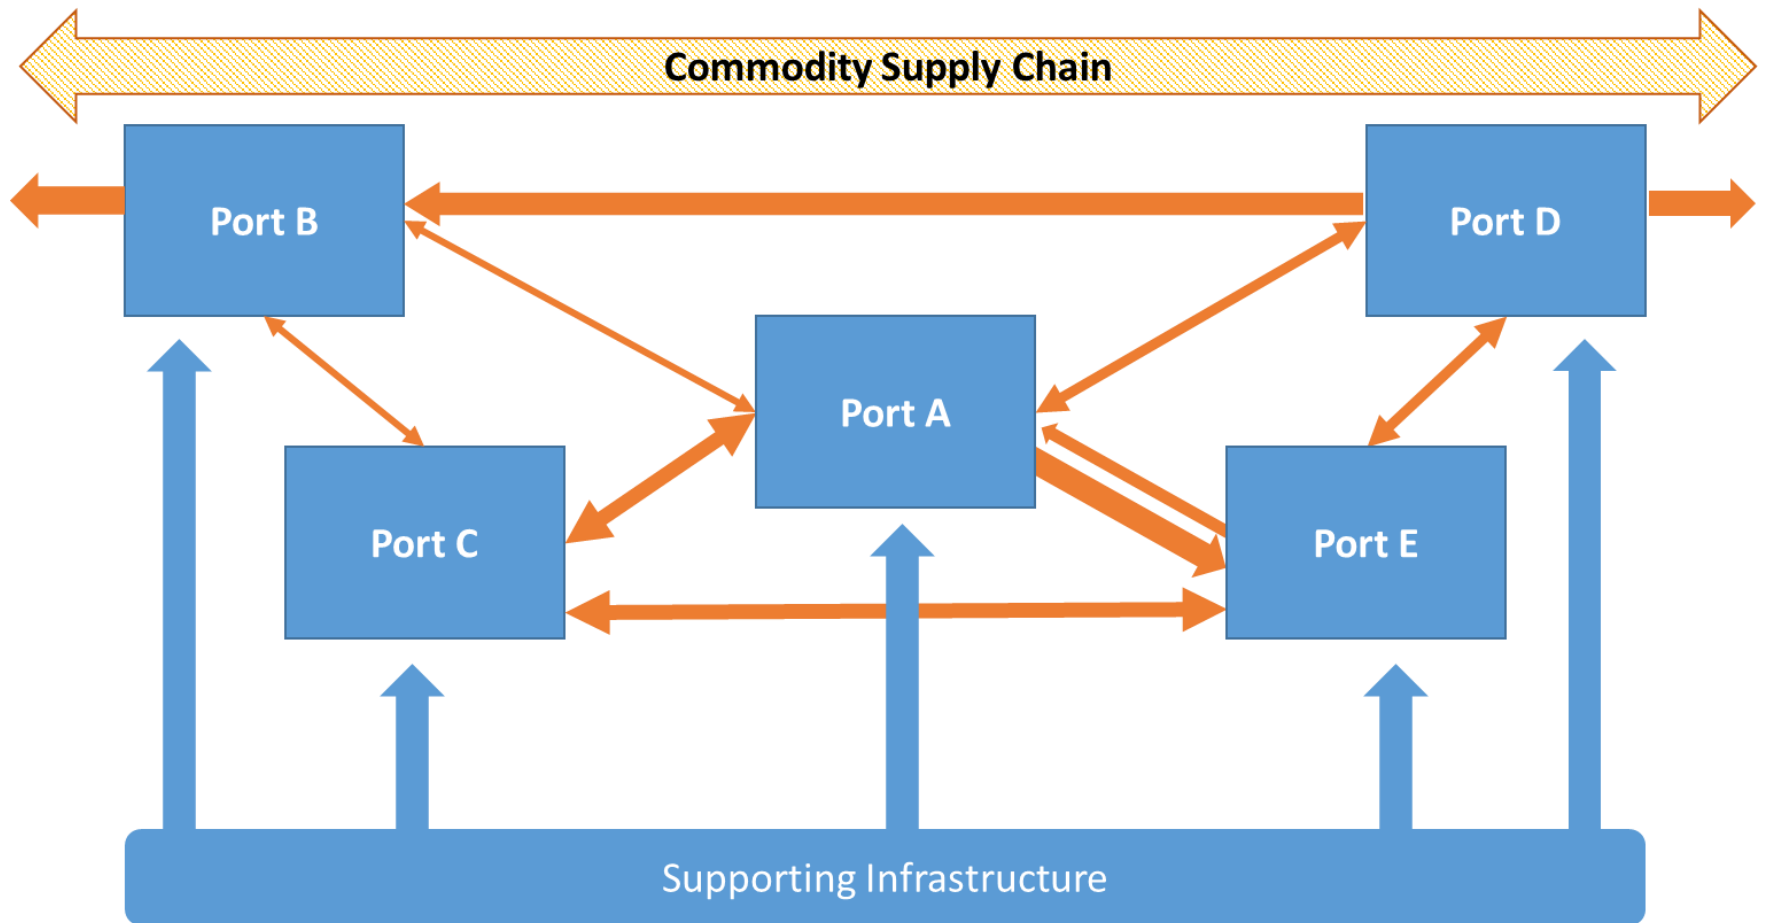

# Port of Savannah – Net Vessel Count for 2016 Hurricane Matthew

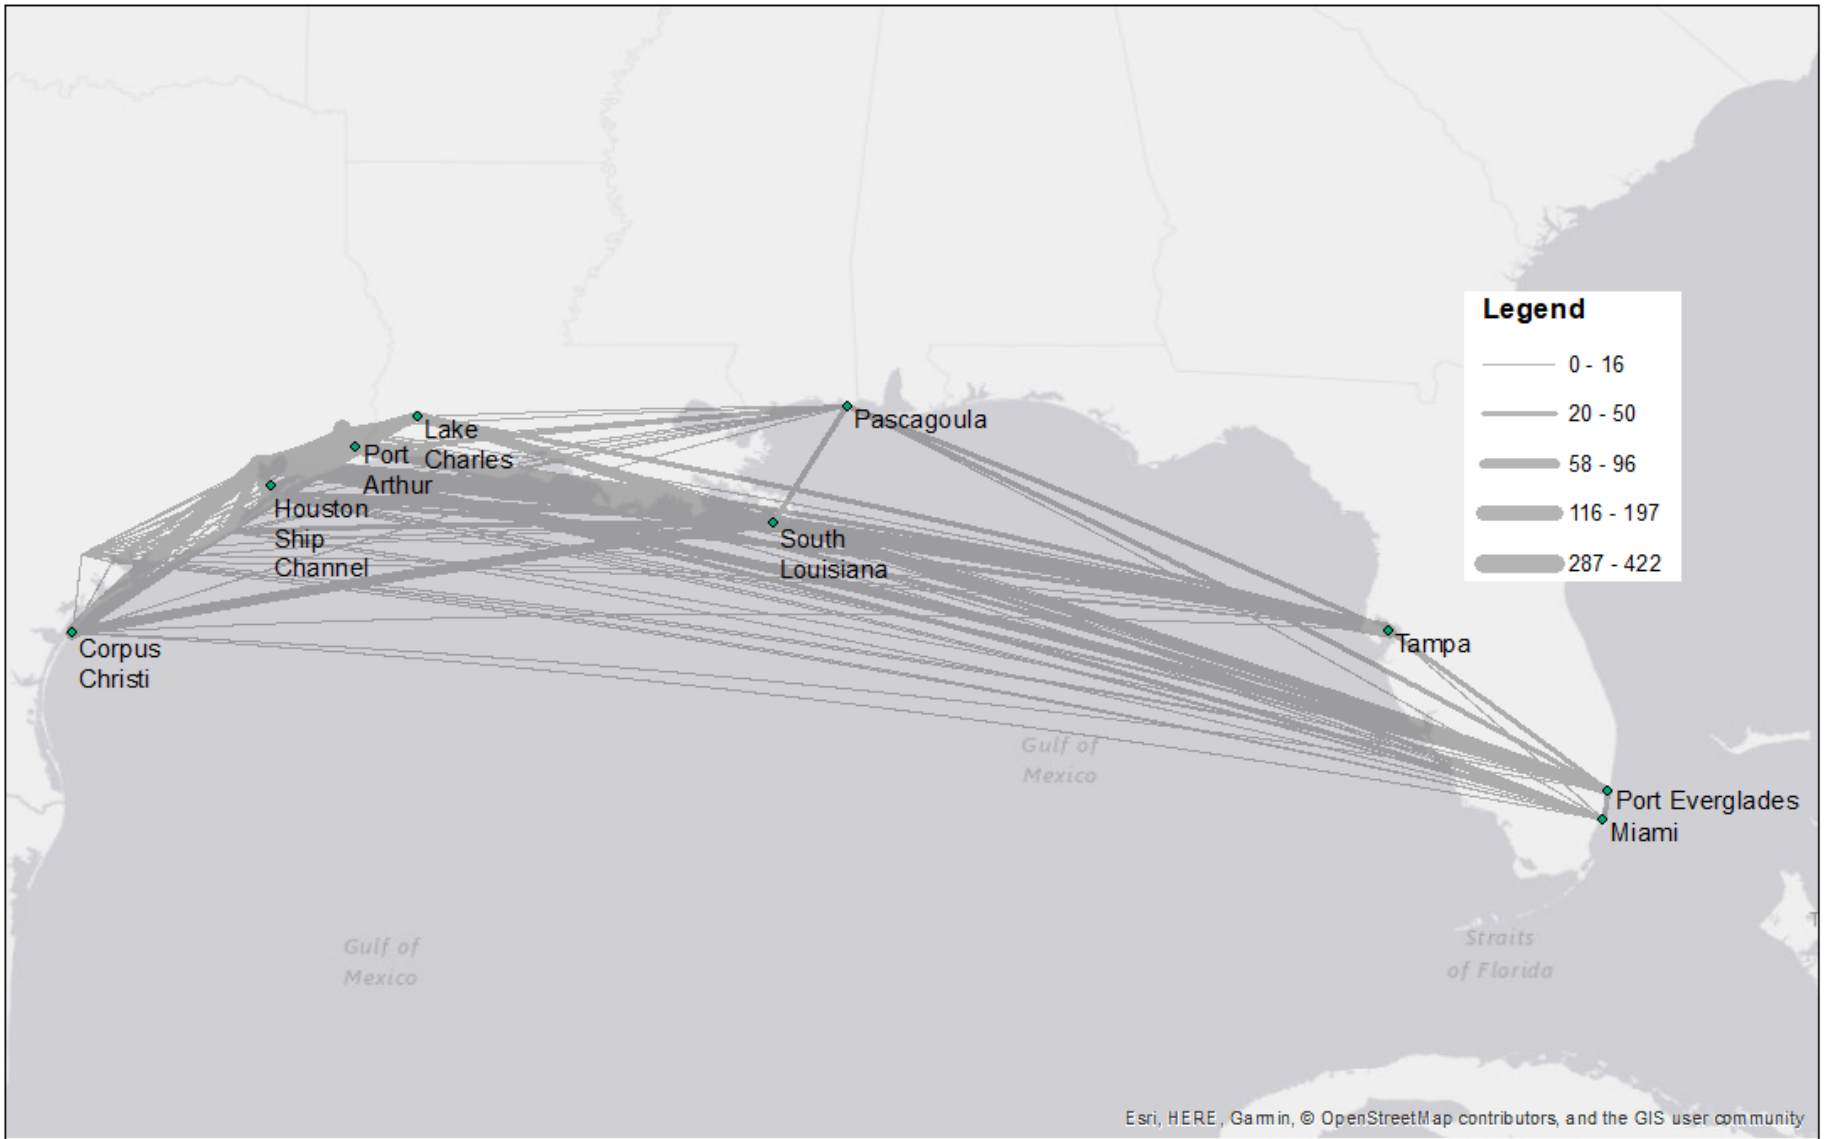

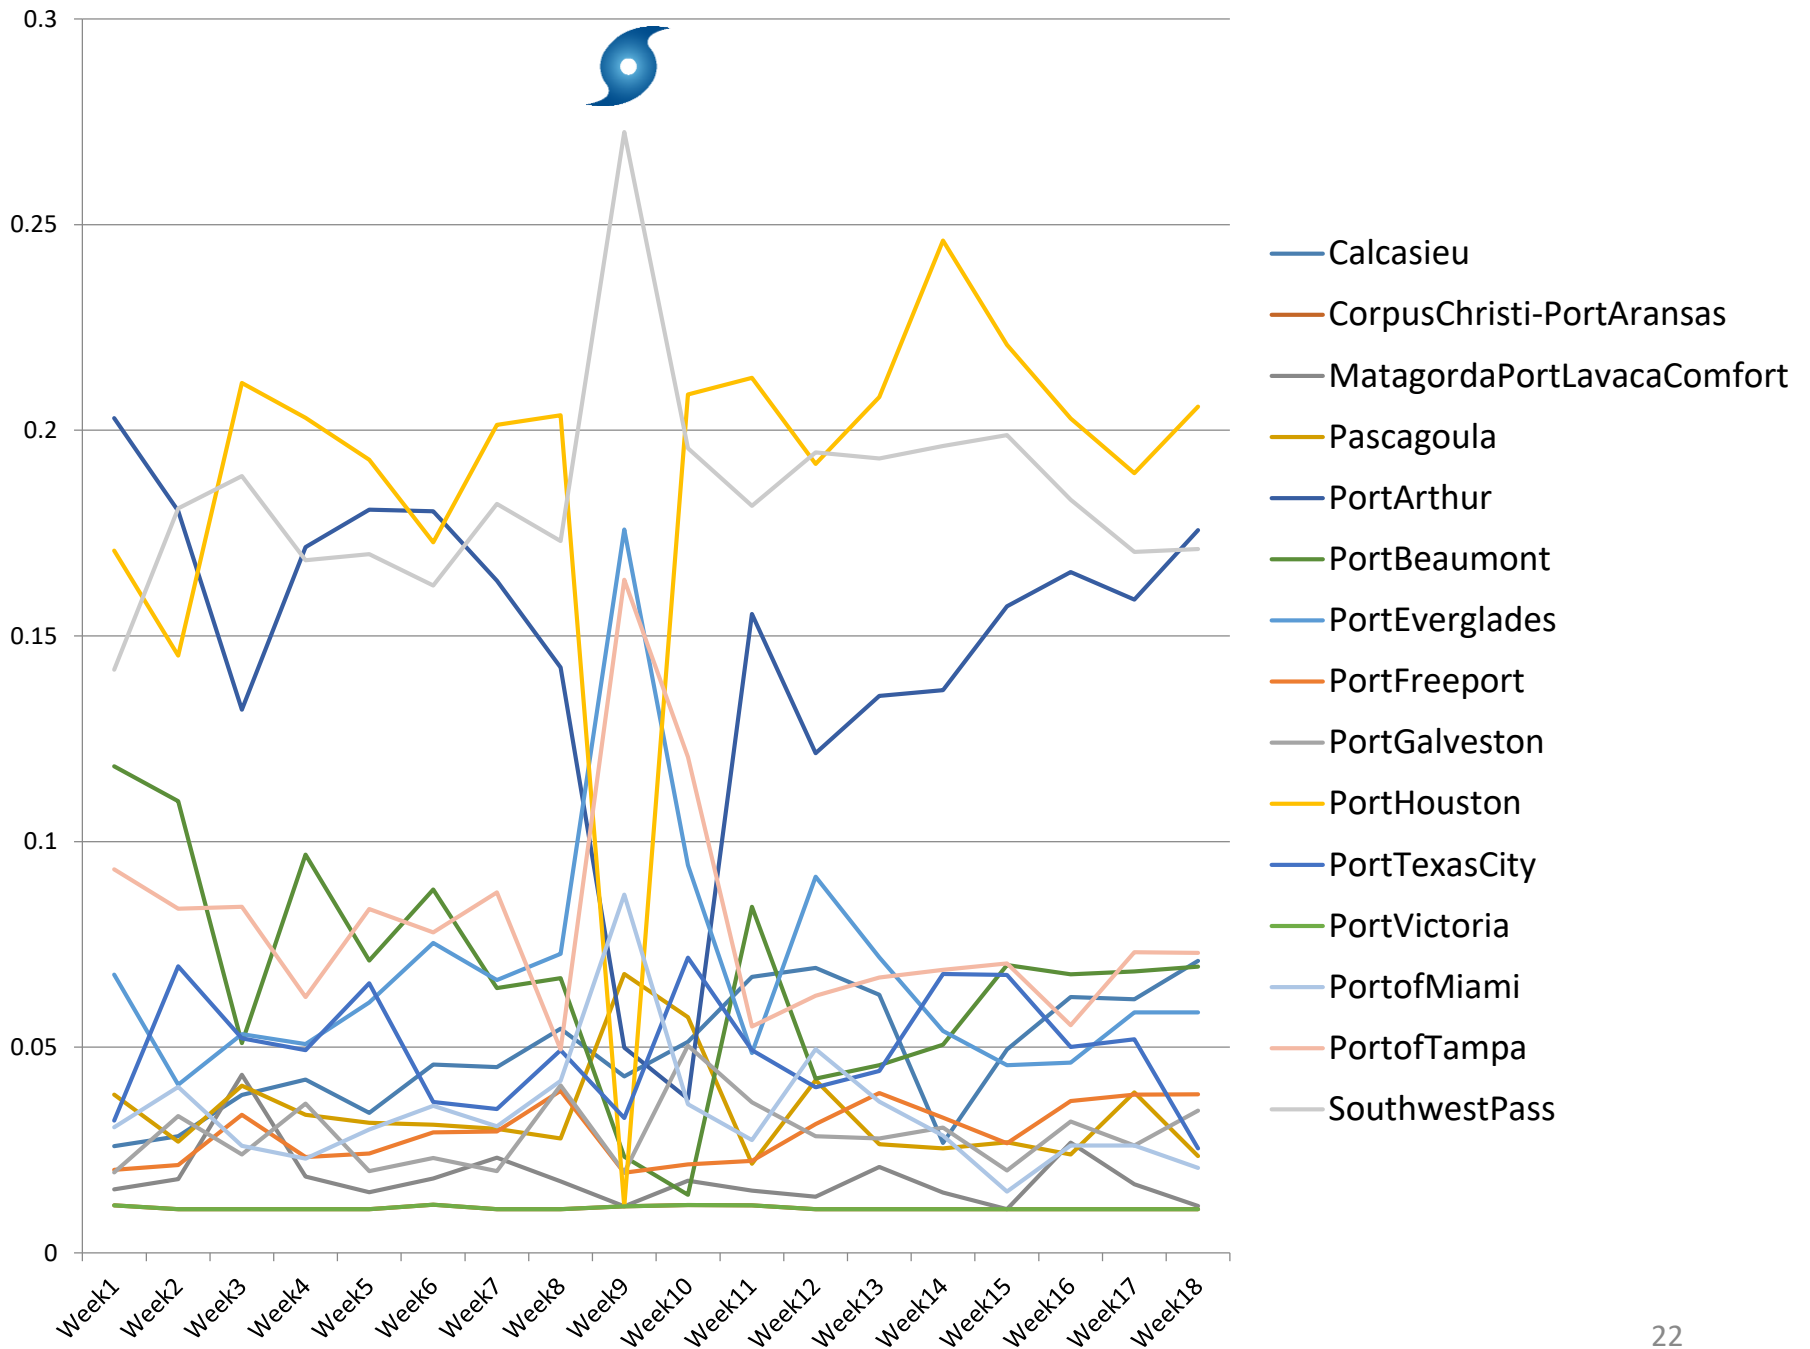

# Port of Savannah - Net Vessel Count for 2017 Hurricane Irma

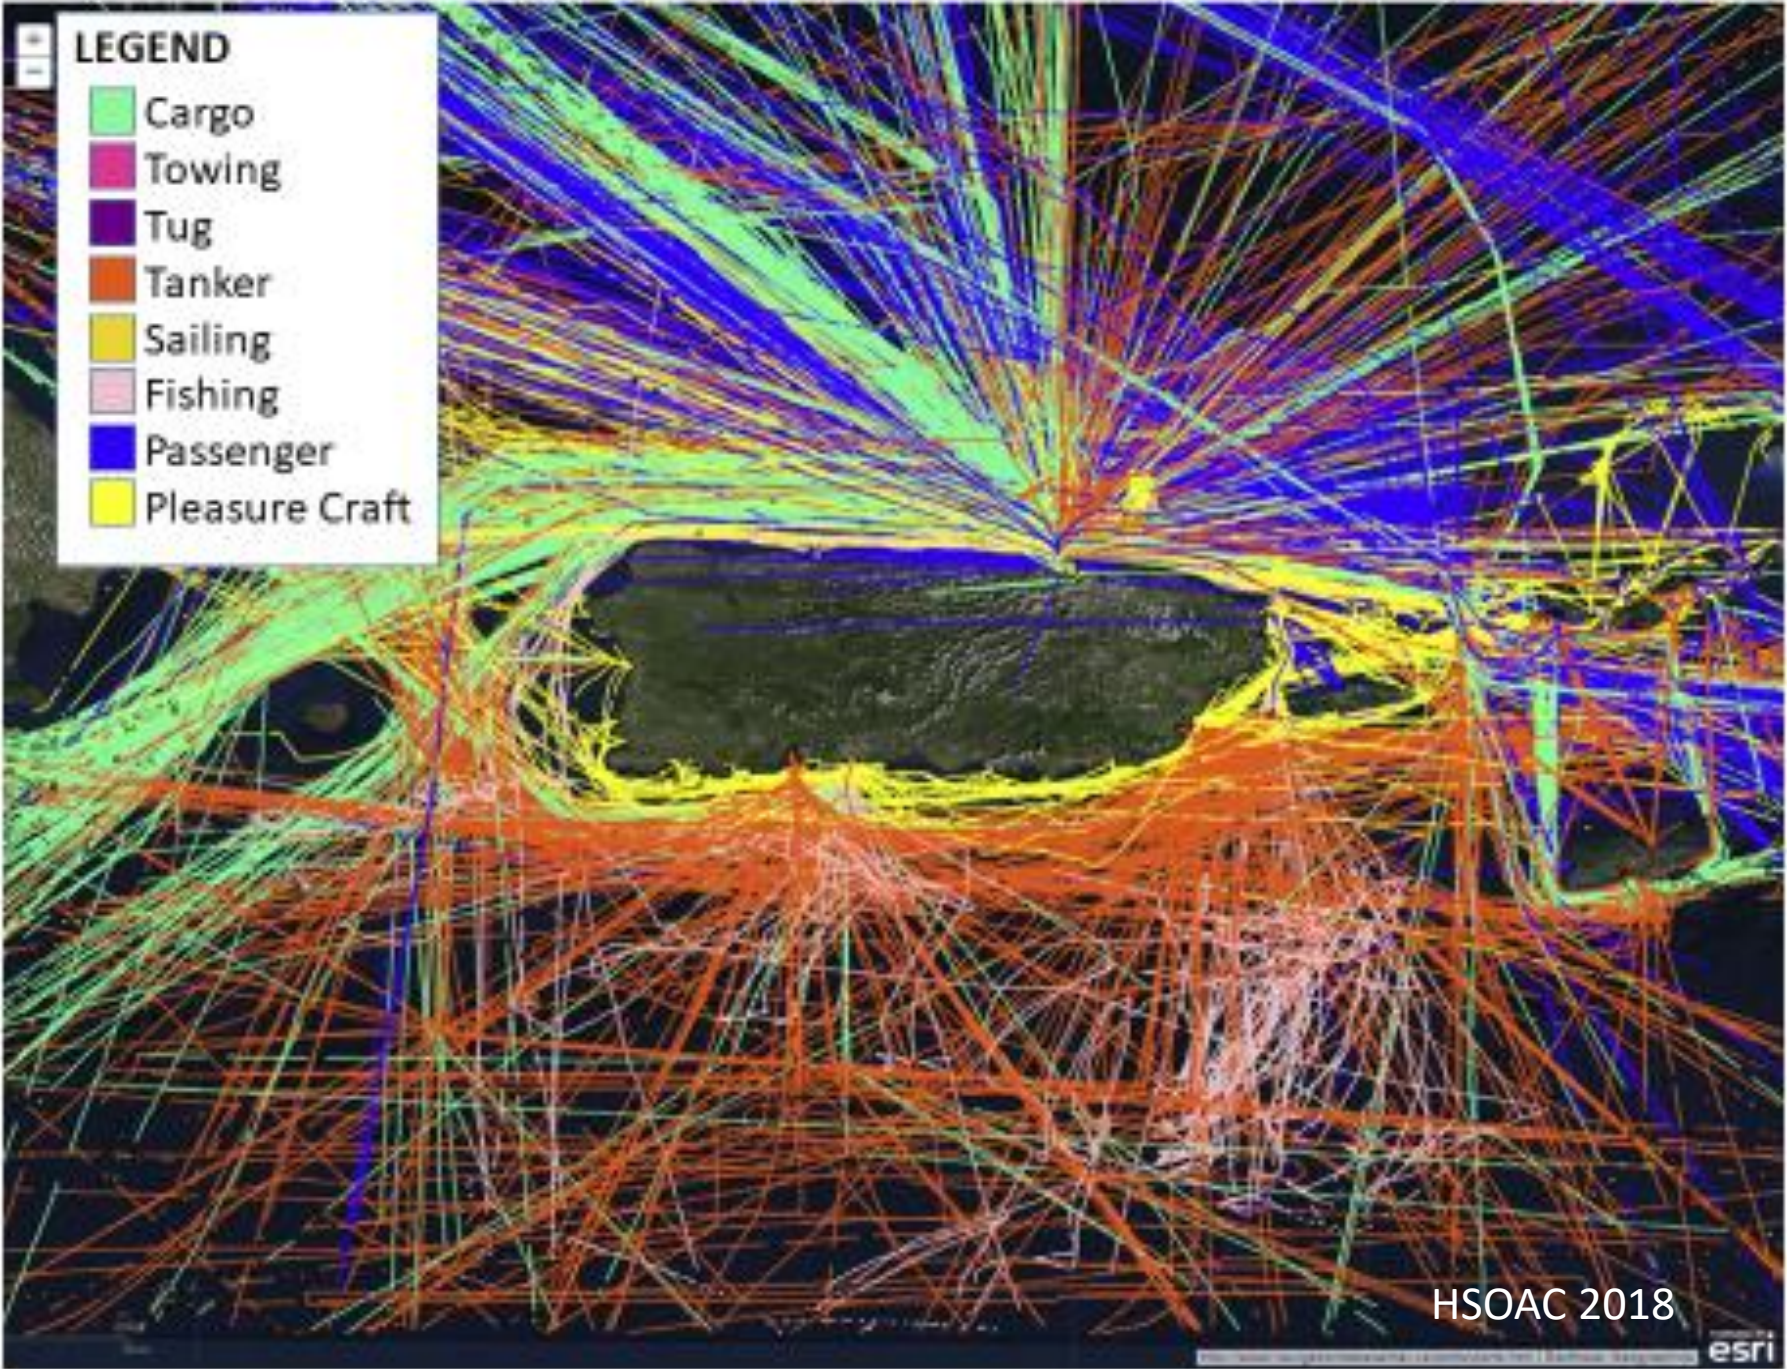

# Multiple Port System

- LEGEND**
- Cargo
  - Towing
  - Tug
  - Tanker
  - Sailing
  - Fishing
  - Passenger
  - Pleasure Craft

HSOAC 2018

# Monthly Vessel Type Counts – Port of Ponce

## 1 Jan 2015 - 1 Jul 2018

# Resilience for Port Stakeholders

**Where do we start** with understanding MTS resilience?

**What information best facilitates decisions** about resilience improvements?

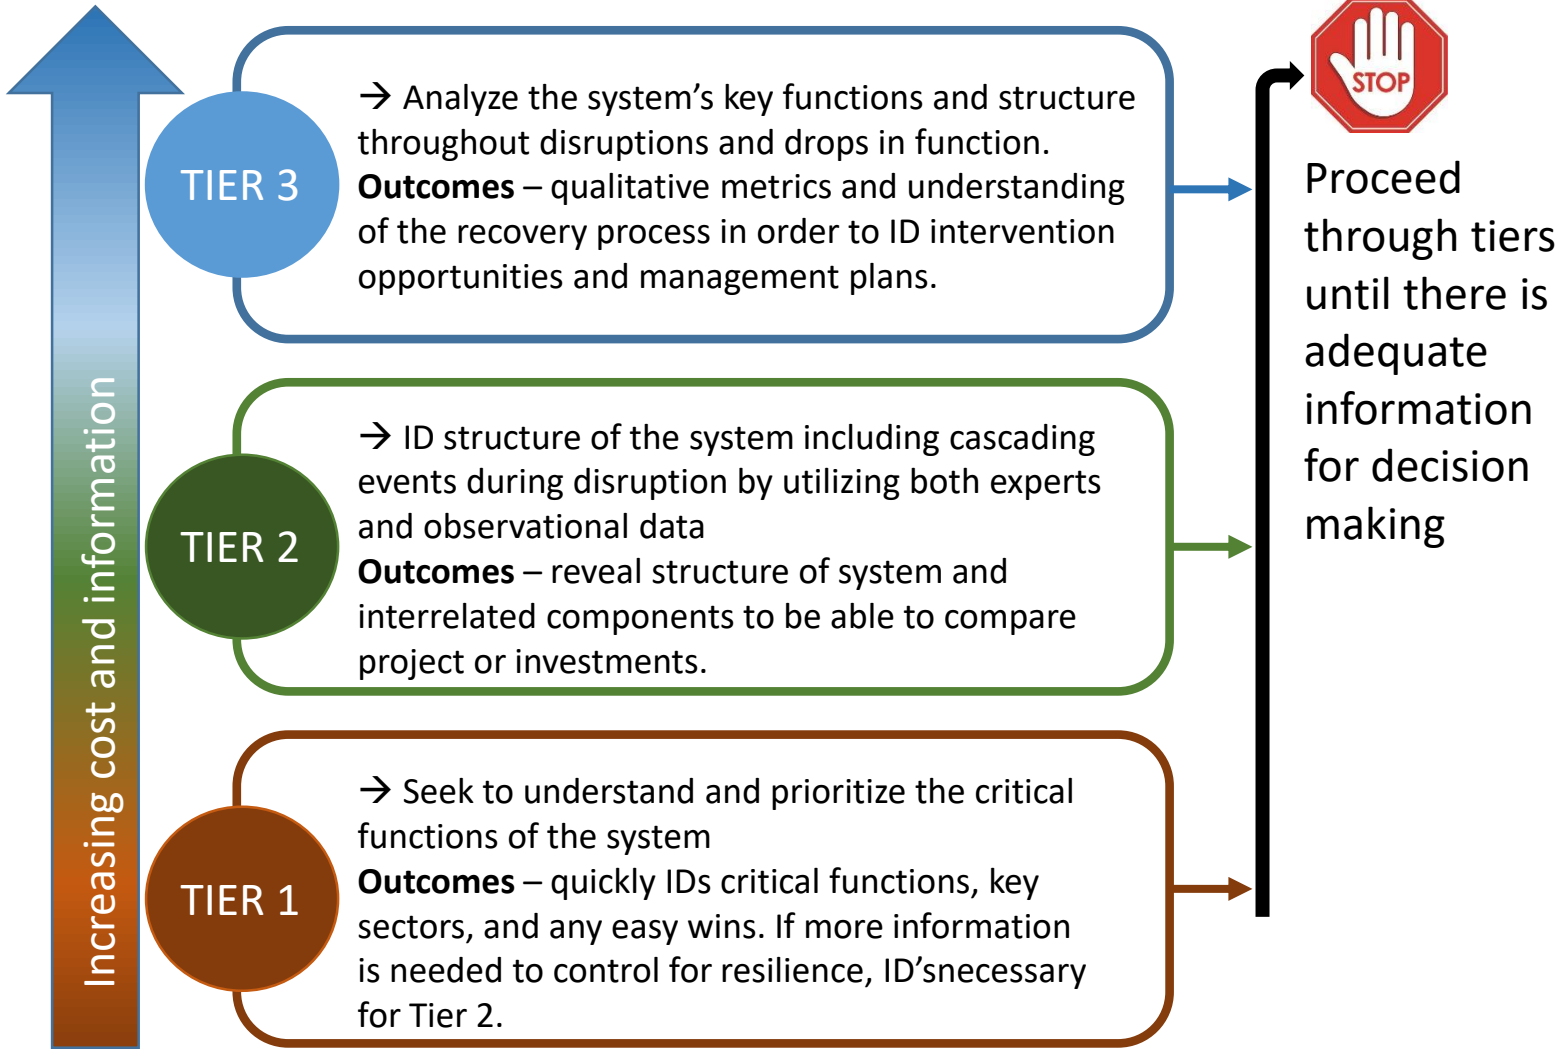

How do we analyze critical infrastructure dependencies and cascading failures?

How do we benchmark progress?

How can this information best be disseminated to stakeholders?

# Port Resilience Assessment and Decision Guide

Tool Example	Single Port	MTS Supply Chain	Inland Waterway
Tier 3	<ul style="list-style-type: none"> <li>- Bayesian Network Analysis (Schultz et al 2016)</li> <li>- Assessment and Measurement of Port Disruption (Weaver 2019)</li> </ul>	Outstanding Need for methodologies!	<ul style="list-style-type: none"> <li>- Bayesian Kernel Critical Infrastructure Analysis of L&amp;D (Baroud 2014)</li> </ul>
Tier 2	<ul style="list-style-type: none"> <li>- Scenario-based exercise with expert elicitation (many examples)</li> </ul>	<ul style="list-style-type: none"> <li>- PORT MAPPER (Trepte and Kai 2014)</li> <li>- Multiple Port Vulnerability Indicators Methodology (Becker 2018)</li> </ul>	<ul style="list-style-type: none"> <li>- Collaborative Modeling to Support Adaptive and Resilient Water Resource Governance in the Inland Northwest (King and Thorton 2016)</li> </ul>
Tier 1	<ul style="list-style-type: none"> <li>- Port Resilience Index (NOAA 2016)</li> <li>- MTS Recovery Plan Guidelines (USCG 2018)</li> </ul>	<ul style="list-style-type: none"> <li>- Supply chain resilience planning</li> <li>- Dredge Optimization Scheduler (USACE 2018)</li> </ul>	<ul style="list-style-type: none"> <li>- Improving Freight Transportation Resilience in Response to Supply Chain Disruptions (NCRFP 2019)</li> </ul>

# Questions?

U.S. Committee on the Marine Transportation System, The 2017 Hurricane Season: Recommendations for a Resilient Path Forward for the Marine Transportation System, U.S. Department of Transportation, Washington, D.C.

# Federal Actions to Minimize Disruption and Enhance Resilience

Findings were identified by applying the Resilience Framework and separated into categories:

- Preparation actions
- Response and recovery actions
- Adaptation actions

# PREPARATION ACTIONS

A	Annual Exercises, Training, Drills
B	Pre-stage recovery assets
C	Proactive Port Assessments
D	Pre-establish a contracting mechanism for response
E	Promote proactive maintenance
F	Consider long term plan for recovery
G	Engage with FEMA in advance
H	Promote mutual aid agreements
I	Promote continuity of management
J	Prioritize critical infrastructure
K	Establish Port Advisory Teams
L	Establish Surge Force w/ private industry
M	Maintain facilities that supply redundancy
N	Multi-agency GIS-based data viewer
O	Establish Regional Port Advisory Teams
P	Predetermine response and recovery priorities

# Recommendations:

## PREPARE

- **Prioritize key infrastructure systems**
- Identify **critical infrastructure interdependencies**

## ABSORB/RESIST

- **Share data** across Federal agencies for recovery projects through interagency teams and data-sharing platforms

## ADAPT

- Develop a **common operating picture** of the port system interdependencies and authorities and prioritizations of essential land and maritime functions
- Hold proactive **planning scenario exercises** and interagency training sessions where recommendations from the past season are communicated and incorporated
- Promote or consider new cutting-edge technologies to understand infrastructure redundancies and reduce vulnerabilities to multiple hazards and to improve port services or support in times of operational failure
