# Maritime industry is different, but not that much

## Factory of the Future 4.0

- Fully digital, seamlessly networked value chain with no/minimal human intervention
- Machine before the human (Considers, Decides, Executes)
- Lean, leaner, leanest (machines find leaner ways of working by themselves)
- Continuous flow
- Single piece versus batch
- Systems thinking
- Automated optimisation of bottlenecks
- Systematic defect reduction

## Logistics of the Future 4.0

- Fully digital, seamlessly networked value chain with minimal/no human intervention
- Machine before the human (Considers, Decides, Executes)
- Lean, leaner, leanest (machines find leaner ways of working by themselves)
- Continuous flow
- Every vessel call is custom-orchestrated
- Systems thinking (port + terminal + land)
- Automated optimisation of bottlenecks
- Systematic defect reduction

SW+Automation

- **Master planning beyond civil engineering problem** – poor value out of typical Port Master Plan deliverables when it comes to technology strategy and tactics
- **Next generation of twins are here** – connected to sensors in real time; classifying new data; running operational scenarios by themselves; autonomously assessing value of changes; capable of changing operational procedures and adjusting behavior of autonomous equipment
