FARRELL LINES

The George Washington Bridge

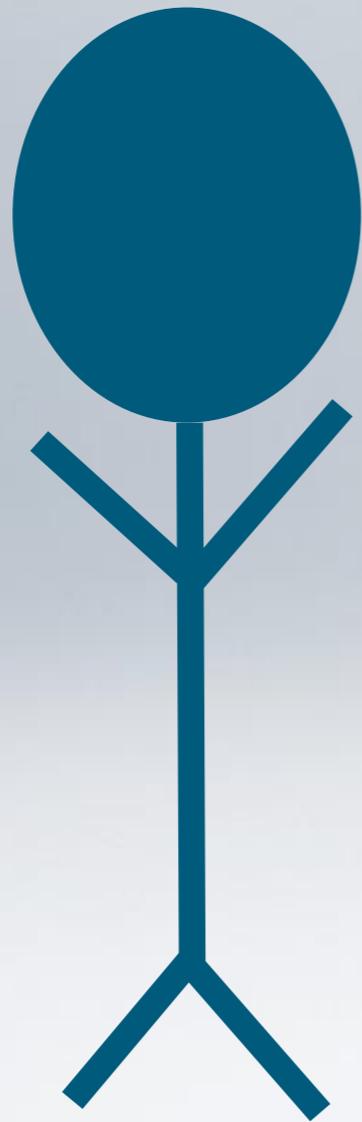

“This port is representative of what ports all around the country do: They help to keep our economy going -- moving products, moving people, making sure that businesses are working... And it's part of the reason why we've been able to increase exports so rapidly, is because we've got some of the best natural resources and waterways and facilities in the world.”

President Obama, New Orleans, Nov. 8, 2013
