

Maryland Port Administration Demonstration Project

Innovative Technology Algal Turf Scrubber

ATS™

Maryland Port Administration

Innovative Technology Algal Turf Scrubber

ATS™

WHY?

The Chesapeake Bay is a national treasure!

Presidential Executive Order 13508

Chesapeake Bay Protection & Restoration

“Fishable & Swimmable” Goals

State Regulators

Wonder what we
do now?

WIPS ?

Storm Water Fees?

Urban Storm Water?

TMDLs for Nutrients and
Sediment

NPDES Permits?

General Discharge & MS4

MPA's Reaction

OH! No!
We have 1000s of acres
of impervious surfaces
and will have to treat
or restore 100s.
What can we do???

WIPS ?

Storm Water Fees?

Urban Storm Water Run off?

Nutrients and Sediment

NPDES Permits?
General Discharge & MS4

WHO? Brains & Brawn of ATS™

Dr. May, UMD

Jamie Smith, MPA

Bill Tittle, MPA

Bill Richardson,
Env. MGR. MPA

Bryce Selby, MPA

Scientific WHO?

Scientists & Engineers

University of Maryland

HydroMentia, Inc. ATS™

Biohabitats, Inc.

Where? Dundalk Marine Terminal

ATSTM

What is an ATS™?

ATS™ Components

- 2*4s
- PVC pipes
- PVC elbows
- Stainless Steel pans
- Electric Pump
- Screen
- Hoses
- Corrugated Pipes
- Flow Meter

What is an ATS™?

Purpose of
Stainless
Steel Pans:

To simulate
wave action

What is an ATS™?

Specifications:

300' * 6' =
1800 Sq. Ft. or
0.045 acre

100 gpm or
144,000 gpd

Slope 1%

What is a ATS™?

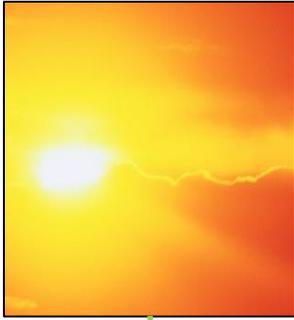

Discharges Cleaner Water to Impaired River

How Does an ATS™ Work?

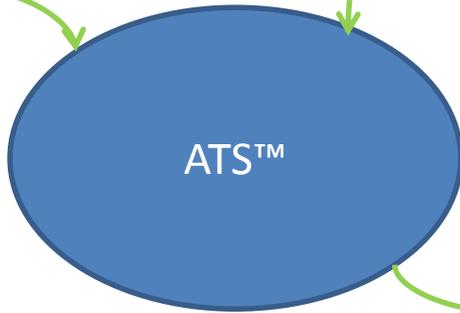

Solar

Wave Action

Algae

River Water

Cleaner Water

More Detail – Next Slide

How Does an ATS™ Work?

Raceway

“Turf “ algae grows on screen of raceway

Uptake of nutrients (N &P), heavy metals and TSS; produces O₂

Harvesting Algae

Biomass

Fewer pollutants & higher dissolved oxygen

Algae

Water

Benefits of an ATS™

Testing Results for 2013

Removal Efficiencies of ATS™:

228 Lbs./Nitrogen/Year

22.8 Lbs./Phosphorous/Year

Average of ATS™ Removal Rate for MPA's

0.045 acre treats 16 impervious acres

Final Stages of Approval Chesapeake Bay Program

Almost.

Demonstration Project for ATS™ Energy Generation Capstone Project UMD

Biomass

Anaerobic Digestion

Biogas

**Energy for
ATS™ Pump**

ATS™ Next for MPA

0.5 Acre Location for ATS™
Expected >100 Acres of Treatment of
Impervious Surfaces

Concerns:

- Loss of Use of Terminal Space
- Labor Intensive (Weekly Harvesting)

The BUBBA for Innovative Urban BMP for Stormwater Improvement

Congratulations, on
winning the BUBBA
award.

The End
