# FISCAL YEAR 2014 Civil Works Budget of the U.S. Army Corps of Engineers

---

April 2013

DEPARTMENT OF THE ARMY  
OFFICE OF THE ASSISTANT SECRETARY FOR CIVIL WORKS  
WASHINGTON, D.C. 20310-0108

OVERVIEW OF FISCAL YEAR 2014 CIVIL WORKS BUDGET

The President's Budget for Fiscal Year (FY) 2014 for the Civil Works program of the Army Corps of Engineers funds the development, management, restoration, and protection of the Nation's water, wetlands, and related resources, through studies, construction, and operation and maintenance of projects, the Corps regulatory program, the cleanup of sites contaminated as a result of the Nation's early atomic weapons development program, and emergency response preparedness. These investments will reduce the risk of flood impacts in communities, facilitate waterborne transportation, restore significant aquatic ecosystems, generate low-cost renewable hydropower, and support American jobs. The Budget focuses on the highest performing projects and programs within the three main water resources missions of the Corps: commercial navigation, flood risk management, and aquatic ecosystem restoration.

The Budget includes a focus on the maintenance of our major commercial, coastal ports, and related efforts. It provides \$374 million for dam and levee safety, including interim risk reduction measures designed to immediately mitigate risk at the highest risk dams, and continued funding to advance the Corps national levee safety initiative. The Budget also includes \$75 million for drought-related work on the Mississippi River, where historic low water conditions already have affected navigation and are expected to persist. The aquatic ecosystem restoration program, for which priorities are informed by interagency collaboration and planning, emphasizes funding to restore several large ecosystems: the California Bay Delta, Chesapeake Bay, the Everglades, the Great Lakes, and the Gulf Coast. The Budget also supports participation in the President's America's Great Outdoors Initiative.

The Budget provides \$4.826 billion in gross discretionary funding for the Civil Works program, offset in part by a proposal to cancel \$100 million in unobligated carryover of funding appropriated prior to FY 2013. Additional funding sources for the FY 2014 program are estimated at \$397 million, including \$300 million in cash provided by non-Federal cost sharing partners. The Budget includes four construction new starts: Hamilton City, CA; Louisiana Coastal Area, Ecosystem Restoration, LA; Lower Colorado River Basin (Wharton/Onion), TX and Columbia River at the Mouth, Oregon & Washington. The Budget includes ten new studies: Yuba River Fish Passage, CA; Chesapeake Bay Comprehensive Study, DE, MD, PA, VA; Louisiana Coastal Area Comprehensive Study, LA; Houston Ship Channel, TX; Coyote Dam, California; Dry Creek (Warm Springs), California; Coastal Texas Protection and Restoration, Texas; Seattle Harbor, Washington; Salton Sea, California; and the nationwide Water Resources Priorities Study. The Budget also provides funding to complete 21 studies or project designs, and five construction projects.

**Construction.** The Budget provides \$1.35 billion for the Construction account and gives priority to the projects with the greatest net economic and environmental returns per dollar invested, as well as to projects to address a significant risk to human safety. The Budget funds capital investments in the inland waterways based on the estimated revenues to the Inland Waterways Trust Fund under current law, while proposing a new user fee to increase revenue to this trust fund to enable a significant increase in funding for such investments in the future. The Budget provides \$309 million for dam safety, seepage control and static instability correction projects on high risk dams.

**Operation and Maintenance.** The Budget provides \$2.588 billion for the Operation and Maintenance account. The Budget gives priority to those coastal harbors and inland waterways with the most commercial traffic, and increases the total amount to be spent from the Harbor Maintenance Trust Fund to a level that is higher than in previous budgets. The Budget also funds harbors that support significant commercial fishing, subsistence, or public transportation benefits, although at a lower total level than in most prior years. The Budget provides operation and maintenance funding for safety improvements at Federal dams and levees based on the risk and consequence of a failure.

**Investigations.** The Budget provides \$90 million for the Investigations account, which funds studies to determine the need, engineering feasibility, and economic and environmental return to the Nation of potential solutions to water and related land resource problems; preconstruction engineering and design; data collection; interagency coordination; and research. The Budget includes funding in the Investigation account for work on proposals to deepen

eight U.S. coastal ports with a high level of commercial use: Savannah Harbor, Georgia; Boston Harbor, Massachusetts; Charleston Harbor, South Carolina; Freeport Harbor, Texas; Houston Ship Channel, Texas; Portland Harbor, Willamette River, Oregon; Norfolk Harbor, Elizabeth River, Virginia; and Seattle Harbor, Washington. The Budget also includes funding on proposals to improve two additional high-use U.S. ports: Mobile Harbor, Alabama and Baltimore Harbor, Maryland. The Budget also includes \$12 million for Army's efforts, in conjunction with State floodplain management authorities, to develop effective flood risks management solutions to flood and storm damages including support of continued development of interagency teams known as Silver Jackets.

Mississippi River and Tributaries. The Budget includes \$279 million for ongoing construction, operation and maintenance, and investigation activities, with emphasis on the 1600 miles of levees and related features on the main stem of the lower Mississippi River and in the Atchafalaya Basin, which reduce the flood risk to a large region.

Flood Control and Coastal Emergencies. The Budget provides \$28 million for preparedness for floods, hurricanes, and other natural disasters, bringing together State and Federal agencies to implement flood risk management solutions.

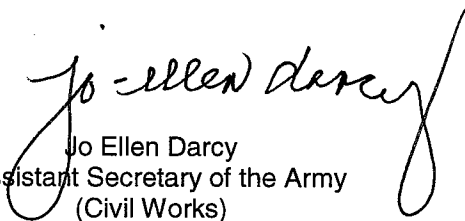

Regulatory Program. The Budget provides \$200 million for the Regulatory Program to provide greater efficiency of permit processing and improve protection of the Nation's waters and wetlands.

Formerly Utilized Sites Remedial Action Program (FUSRAP). The Budget provides \$104 million to clean up sites contaminated as a result of the Nation's early atomic weapons development program.

Expenses. The Budget provides \$182 million for the Expenses account, which funds the civil works responsibilities of the Corps headquarters and division offices, and certain other costs.

Office of the Assistant Secretary of the Army for Civil Works. The Budget provides \$5 million for the Office of the Assistant Secretary of the Army for Civil Works, whose responsibilities include policy direction and oversight of the Civil Works Program.

The FY 2014 Budget for the Army Civil Works program addresses these and other high priority efforts, and supports interagency and stakeholder collaboration. The Budget represents a continuing, fiscally prudent investment in the Nation's water resources infrastructure and in the restoration of its aquatic ecosystems. The FY 2014 Budget will enable the Corps to continue contributing to the larger Federal, state, and local effort to manage these resources responsibly.

**DEPARTMENT OF THE ARMY CORPS OF  
ENGINEERS – CIVIL WORKS FISCAL YEAR 2014  
BUDGET REQUEST**

The Fiscal Year 2014 Budget provides \$4,826,000,000 for the Civil Works program of the U.S. Army Corps of Engineers. The Civil Works program supports water resources development, management, and restoration through investigations and surveys, engineering and design, construction, and operation and maintenance as authorized by Congress. Funding for the Civil Works program includes \$397,000 in additional new resources, including \$300,000 in non-Federal contributions. Based on current estimates, required FY 2014 appropriations and additional new resources are as follows:

<b>Requested Appropriations:</b>	<b>Amount (\$)</b>
Investigations	90,000,000
Construction	1,350,000,000 1/
