MORE CAPACITY

DEDICATED REFRIGERATED CONTAINER SPACES

THE MOST OF ANY OTHER U.S. EAST OR GULF COAST TERMINAL

More capacity means more efficiency in moving your temperature-controlled cargo. That's why the Port of Savannah has invested in more than 2,800 dedicated refrigerated container spaces, with more on the way. And with the fluid single-terminal operations, more land-side cold storage and a strategic location closer to large markets, we have all the advantages you need for your perishable cargo.

Dedicated Refrigerated Cargo Team - USCBP & USDA on Terminal
Nine Deepwater Berths • More Than 722,000 ft³ of Cold Storage
38% of All U.S. Containerized Poultry Exports
Move Through Savannah

No other U.S. East Coast or Gulf Coast port does more.
