and Related Agencies
2007 Rayburn House Office Building
Washington, DC 20515
c/o Darren Benjamin

Dear Chairwomen Murkowski and McCollum and Ranking Members Udall and Joyce,

The American Association of Port Authorities (AAPA) is the unified and collective voice of the seaport industry, and today we are writing to ask you to provide continued robust funding for the Environmental Protection Agency's National Estuary Program (NEP) in FY 2020 appropriations. Established in 1987 by Congress to restore and protect estuaries of significant importance, NEP is composed of 28 individual programs. President Trump has recommended eliminating the program again in FY 2020, but many ports located in national estuaries participate in local programs.

The National Estuary Programs are an essential partner for port authorities in terms of environmental sustainability of the bays and ecosystems that are within or adjacent to ports. NEPs provide important research and analysis on bay ecosystems that assist with protection and restoration of very valuable national resources. NEPs provide education and awareness that is important for non-regulatory and voluntary programs that are supported and implemented locally. This local support is key to the success of preservation and restoration efforts.

NEPs facilitate many stakeholders coming together and developing an appropriate Bay Plan, identifying funding for plan projects and implementation of the Bay Plan. Priorities in a Bay Plan for example might be public access and recreation, environmental education, water quality and freshwater inflows, habitat protection and restoration, fish and wildlife conservation, maritime commerce and dredging, and monitoring and research. NEPs facilitate and ensure coordination of these types of activities, and to lose the funding for these activities means that other entities would need to take on that role. The cohesion that NEPs provide communities in bringing industry, maritime and residents to the table for discussion would be lost. This map shows the [location of these estuaries](#).

We appreciate your strong support for NEPs in the past and urge continued funding for this program in a FY 2020 Interior, Environment and Related Agencies Appropriations bill.

Thank you in advance for considering our request.

Sincerely,

A handwritten signature in black ink, appearing to read "Kurt J. Nagle". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
