

Port of Los Angeles

Special Event: “Clean Future Fair” – This blue/green-colored and kite-themed event was designed to carry the port’s “green growth” and clean air goals to the general public, port employees and members of the seaport industry. In a fun, family format, the event exhibited various consumer and industry programs. Special attractions for children asked them to pledge their own commitments to an improved environment. Additionally, free boat tours with environmentally focused narrations and 500 giveaway trees highlighted the event, with exhibits ranging from new energy technologies and alternative fuel vehicles, to a high-tech locomotive.
