

## Ports of Indiana

**Website:** [www.portsofindiana.com](http://www.portsofindiana.com) – The goal of Ports of Indiana’s award-winning website is to serve as the primary “portal” or entry point for the authority’s system of port facilities, which are as much as two hours driving distance from its headquarters in Indianapolis. The website, which incorporates moving maps, masthead pictures and animation features that change automatically or with every visit or refresh, helps “bring together” the diverse and geographically distant elements of the port.
