2017 PORT SECURITY SEMINAR & EXPO

ISACA/CISM Information Security Management Training for Security Directors/Managers
2017 Port Security Seminar & Expo

Agenda

- Introduction
- ISACA
- Information security vs. cybersecurity
- CISM certification
- Other security certifications
Michael Podemski, CISA, CISM, CRISC, CIPM, CIPT, is a Senior Manager in the Risk Advisory Services practice of Ernst & Young LLP. He focuses on managing and delivering high-quality IT assurance and advisory engagements, including financial statement audits/internal controls over financial reporting (SOX 404), pre- and post-implementation system reviews, IT audits (co-sourcing), and Service Organization Controls (SOC 1 and SOC 2) reports. He also recognizes that our commitment to service quality extends to bringing relevant insights and industry experiences to his clients. Furthermore, he has been recognized for developing high-performing teams that deliver exceptional client service. Prior to EY, he has over 15 years of experience in IT Internal Audit, IT operations, and IT solutions delivery.

In addition to his role as a senior manager, he is the immediate past president of the Chicago chapter of ISACA where he serves as an advisor to the current president and other board members as well as assist in organizing events, chairing special committees, or researching responses to questions from the board. Besides his role as the immediate past president, he is an instructor for the CISA, CISM, and CRISC certification review courses. In addition to ISACA, he is a Chicago KnowledgeNet co-chair for the International Association of Privacy Professionals.
For nearly 50 years, ISACA has been a pace-setting global organization for information governance, control, security and audit professionals.

As a nonprofit, global membership association for IT and information systems professionals, ISACA is committed to providing its diverse constituency of more than 140,000 professionals worldwide with the tools they need to achieve individual and organizational success. The benefits offered through our globally accepted research, certifications and community collaboration result in greater trust in, and value from, information systems. Through more than 200 chapters established in more than 80 countries, ISACA provides its members with education, resource sharing, advocacy, professional networking, and a host of other benefits on a local level.
Information security deals with information, regardless of its format – it encompasses paper documents, digital and intellectual property in people’s minds, and verbal or visual communications.

Cybersecurity is the protection of information assets by addressing threats to information processed, stored, and transported by internetworked information systems.
The management-focused **CISM** is the globally accepted standard for individuals who design, build and manage enterprise information security programs. CISM is the leading credential for information security managers.
Benefits of the CISM certification

- Demonstrates your understanding of the relationship between an information security program and broader business goals and objectives
- Distinguishes you as having not only information security expertise, but also knowledge and experience in the development and management of an information security program
- Puts you in an elite peer network
- Is considered essential to ongoing education, career progression and value delivery to enterprises
2017 Port Security Seminar & Expo
