Title: Global Fuel Standards in Effect
Presented By: Casey Grigsby
Florida Seaports
Jacksonville currently has the largest bunkering operation at any U.S. port.
One of the world’s first combo roll on/roll off ships powered by LNG.
Florida has been the epicenter of America’s space program, with LNG use in its future.
Later this year, Port Canaveral will homeport the first fully liquefied natural gas-powered cruise ship in North America, the *Mardi Gras*.
