Occupational Safety and Health & Related Issues

An Overview and History for Port Industry Executives
Port Worker Dies From Fall

By Hunter Sauls

FREEPORT — Port workers are mourning the death of a longshoreman working onboard a cargo ship at the Port of Freeport who port officials said accidentally fell to his death.

George Diaz, 54, of Freeport, a member of the International Longshoreman’s Association union working for Ports America, was on the deck of the MV Green Music on Tuesday when he fell into a cargo hold, Ports America vice president Norman Lamb said. The distance of the fall through the cavernous cargo hold was enough to cause serious injury, he said.

“He’s been involved in longshore work since 1972, and one of the more experienced and well-respected guys down there,” Lamb said. “He’s going to be missed. It’s a tragedy.”

Diaz suffered a head wound and was taken by ambulance to Brazosport Regional Health System. He was then taken by helicopter to Memorial Hermann Hospital, where he was pronounced dead upon arrival, Lamb said.

“We’re investigating the accident, and we’re in the middle of that process,” Lamb said. “We don’t have all the answers yet, because we haven’t completed the interviews. But our thoughts and prayers go out to his family.”

Diaz was married and the father of two girls, Lamb said.
Update: Oakland Port Closed Until Tomorrow
By William Brand, Francine Brevetti, Erik N. Nelson, Staff Writers
Article Last Updated: 09/25/2007 12:53:38 PM PDT

The entire Port of Oakland shipping operation remains shut down this afternoon, idling hundreds of port workers and truck drivers, while an investigation continues of the accidental death of an ILWU Longshoreman aboard a ship at the Port Monday afternoon.

Details remain sketchy, but the Alameda County Coroner's office said the worker was apparently struck by a shipping container as he worked aboard the Stutgard, a Hapag-Lloyd container ship. No one apparently witnessed the accident, which happened about 4:30 p.m., the coroner's office said. Coroners' deputies had to use a cargo lift to remove the body from the ship, a deputy said.

John Showalter of the ILWU said work was stopped immediately throughout the port pursuant to a contract provision. "It's standard for workers to stand down when there's a fatality," Showalter said. "The reasons are self-evident. If faulty equipment caused the death, it needs to be inspected," he said. Diann Castleberry of the Port of Oakland said all operations are shut down and will remain shut down possibly until 8 a.m. Wednesday. The port was very quiet this morning. Every terminal was locked up and only a handful of trucks could be seen and none had containers on them.

Many customs and security offices were also closed. Outside the 7th Street terminal near Berth 40 there was a line of containers without cabs. Currently, there are seven container ships tied up at the port either in the process of loading or off-loading cargo, according to the Marine Exchange of the San Francisco Bay Region.

Man Crushed to Death by Container at Portsmouth Terminal

BY JEN MCCAFFERY AND GREGORY RICHARDS, The Virginian-Pilot © July 13, 2007 | Last updated 5:39 PM Jul. 13

A man was killed this afternoon at Portsmouth Marine Terminal when he was crushed by a truck-sized cargo container.

The victim was 42-year-old Vernon Leroy White, said Portsmouth Battalion Chief Ronnie Early. White lived in Norfolk, according to someone who answered the phone at his home this afternoon.

He had been working on the SCI Kiran, which was docked at the terminal, said Joe Harris, spokesman for the Virginia Port Authority.

Shortly before noon, White had walked down the ship’s gangplank and onto the dock, Early said. White walked under a crane and was crushed by a container being lowered by the crane, Early said.

He yelled for help as the box was coming down, Early said, but his co-workers were not able to inform the crane operator in time. He was pronounced dead at 12:07 p.m.

From on-site investigators, The Blueocean Company has learned that as Mr. White got to the bottom of the gangway (the workers were just knocking off for lunch) and proceeded forward his presence was hidden from on-the-ground spotters by a container that had been previously landed on dock. Moreover, it is likely that the container crane’s sill beam blocked the crane operator’s line of sight, contributing to this terrible accident. We understand that his Dad, Roy White, was working at a forward hatch at the time of this accident.
LONG BEACH, Calif. -- If the U.S. container trade continues to increase about 7.5 percent per year, three-quarters of the country's major ports will experience significant capacity problems by 2010, according to a marine architect who has designed container terminals around the world.

Ports in the United States handle less than 5,000 TEUs per-acre, per-year, while Asian ports handle more than 16,000 TEUs per acre, Vickerman told a marine terminal management training program Monday sponsored by the American Association of Port Authorities.

Although Asian terminal operators have more flexibility in their use of labor and equipment, the main reason they are so productive is that they work three full shifts per day, Vickerman said. Distribution facilities likewise work around the clock, so containers incur very little dwell time at marine terminals. In the U.S., where dock labor is more expensive, most terminals work only one shift per day. This explains the low productivity figures of about 2,661 TEUs per acre at East Coast ports and 4,944 TEUs at West Coast ports. Los Angeles-Long Beach now runs five extra shifts per week, and this increases productivity by moving about 30 percent of the truck traffic to off-peak hours.
Potential Translation:

Work Harder, Faster, and Longer

Potential Result:

More Accidents; More Deaths
Potential Moderating Factors:

- Terminal Operators/Ocean Carriers Working Smarter; With Compatible Priorities

- Port Authorities Acting As Independent Catalysts, By Requiring Adherence to Tariff-Established Operational Parameters that Better Define Priorities
A Little U.S. History

[Comparable Circumstances at AAPA Member Ports in Canada, the Americas and the Caribbean]
The Jensen Era

- **Southern Pacific v Jensen** (1917)
- **Knickerbocker v Stewart** (1920)
- **Washington v Dawson** (1924)

Memorializing an internecine turf fight between the U.S. Congress and the Supreme Court, in determining the method (or indeed the existence) of worker’s compensation for injuries sustained “on the navigable waters.”
LHWCA of 1927

- Creates a Federal scheme for the payment of compensation to marine cargo handling and shipyard workers injured "on the navigable waters."

- Clarified by the Supreme Court in:
  - T. Smith & Son v Taylor (1928)
  - Minnie v Port Huron Terminals (1935)
(1951) Organized Labor Initiates Attempts to “Perfect” the LHWCA

- ILA/ILWU
- Boilermakers
- Steelworkers

- Higher than usual number of explosions in shipyards.
- Increased trade volumes w/more cargo gear failures.
- Political incentives to reseat a Democratic president
The Political Landscape

COMMITTEE ON EDUCATION AND LABOR

GRAHAM A. BARDEN, North Carolina, Chairman
AUGUSTINE B. KELLEY, Pennsylvania

SUBCOMMITTEE ON SAFETY IN LONGSHORE AND HARBOR WORK

JOHN F. KENNEDY, Massachusetts, Chairman
CLEVELAND M. BAILEY, West Virginia
CARROLL D. KEARNS, Pennsylvania
Sustained organized labor efforts to widen LHWCA coverage and increase safety protection.

Political impetus now gradually translated into labor support for one prospective Democratic presidential candidate.
The 1958 LHWCA Amendments

[Public Law 85-742]

- Political compromise brokered by Lyndon Johnson, with JFK as strongest proponent.
- Resisted by Ike; needed by Richard Nixon in his (1960) bid for Presidency.
- Expanded §41 of LHWCA, to provide for safety standards, enforcement and training.
- Put in the enforcement hands of DOL (LSB).
The Longshoring Industry Safety Regulations

- Published in the Federal Register - February 20, 1960
- Applicability tracked the jurisdiction of enabling legislation (LHWCA), i.e., to work “on the navigable waters”
- Work on terminals therefore, not covered
The Occupational Safety and Health Act of 1970

[Public Law 91-596]

Signed into law by Richard Nixon, December 29, 1970

Extended to all workplaces

Adopted all existing Federal Safety Standards (including the Longshoring safety regulations)

“on the navigable waters” limitations of LHWCA (for safety/health) no longer apply
LHWCA Extensions of 1972

- Brings Federal program of compensation ashore
- Now additionally covers “related employments”
- Substantially boosts amount of compensation paid to recipients (66 2/3% of average wkly wage)
**Applicability of OSHA Regulations to Marine Cargo Handling Operations**

<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Horizontal Rules:</strong></td>
<td>All regulations contained in 29 CFR Part 1910, OSHA’s Rules for General Industry.</td>
</tr>
</tbody>
</table>
The Marine Terminals Standard

- 29 CFR Part 1917 reduced the volume of applicable regulations by 75%
- Custom tailored in unison with labor & management interests
- Included criteria for safely conducting modern cargo handling operations
- Applies from gate to gangway
Modernizing Part 1918 Standards

- Afloat marine cargo handling rules had very little change since the 1960’s

- Needed to subjectively track, without any variance, the shoreside (Part 1917) rules
Human Suffering
Financial Loss
(With Loss Of Life)
Greater Financial Loss
Accidents: Direct/Indirect Costs

- Worker’s Comp: “The Manual Rate”
- All In Costs: 4-15 Percent of Total Payroll
- Therein lies the difference between profit and loss in an industry with razor thin profit margins
ILA Seeks Safety Talks

The president of the International Longshoremen's Association has called for port safety meetings with employers and federal agencies following recent accidents that killed a union dockworker in New Jersey and injured three others in South Carolina.

"Safety remains a top priority with the ILA as it is with our employers," said ILA President John Bowers. "However, something is wrong when ILA members are killed or critically injured at the work sites. We need to address this problem immediately."
